LIST OF TABLES

Chapter 2: Review of literature
Table 2.1 Criteria for the diagnosis of diabetes mellitus 7
Table 2.2 Classification of diabetes mellitus 9
Table 2.3 Classification of diabetes distress score 42

Chapter 3: Methodology
Table 3.1 Asian Cut offs for body mass index 68
Table 3.2 Asian cut off points for waist circumference 68
Table 3.3 WHO cut off points for waist to hip ratio 69
Table 3.4 Flow chart of stage I and stage II 74

Chapter 4: Result and discussion (Stage I)
Table 4.1 Demographic profile of subjects 75
Table 4.2 Socioeconomic status of subjects 76
Table 4.3 Subjects Profile (Anthropometric status) 77
Table 4.4 Markers of central obesity of subjects based on WHO and Asian Cut offs 77
Table 4.5 Biochemical parameters of diabetic subjects 79
Table 4.6 Duration of diabetes 80
Table 4.7 Gynaecological status of female subjects 82
Table 4.8 Smoking, alcohol and tobacco consumption among participants 84
Table 4.9 Diabetes distress score in the present subject group 84
Table 4.10 Total diabetes distress and component score among diabetic subjects 85
Table 4.11 Comparison of diabetes distress score across gender 86
Table 4.12 Comparison of diabetes distress score across socioeconomic status 87
Table 4.13 Diabetes distress score across duration of diabetes 88
Table 4.14 Diabetes distress score across number of family members 88
Table 4.15 Effect of treatment modality on diabetes distress score 89
Table 4.16 Multivitamin / Multimineral supplementation prescribed to subjects 91
Table 4.17 Calorie and macronutrient consumption 93
Table 4.18 Prevalence of fasting and weekly frequency 95
Table 4.19 Prevalence of eating out and weekly frequency 95
Table 4.20 Effect on eating out frequency on glycemic control and obesity markers 96
Table 4.21 Impact of eating out frequency on calorie and macronutrient consumption 97
Table 4.22 Dietary assessment of diabetic subjects 98
Table 4.23 Dietary antioxidant intake of diabetic subjects 99
Chapter 5: Result and discussion (Stage II)

Table 5.1 Demographic profile of subjects 101
Table 5.2 Anthropometric status of subjects 102
Table 5.3 Biochemical parameters across the groups 103
Table 5.4 Renal function test across the groups 104
Table 5.5 Diabetes distress score among diabetic subjects with and without complication 108
Table 5.6 Diabetes distress across components in diabetic subjects 109
Table 5.7 Treatment modality of diabetic subjects with and without complications of diabetes 110
Table 5.8 Number of fruits and vegetables consumed per day across the groups 113
Table 5.9 Antioxidant enzyme activity across the groups 125
Table 5.10 Effect of gender on antioxidative status across groups 127
Table 5.11 Effect of treatment modality on antioxidative status across groups 128
Table 5.12 Effect of body mass index on antioxidative status across groups 129
Table 5.13 Effect of duration of diabetes on antioxidative status across groups 130
Table 5.14 Effect of glycemic control on antioxidative status across groups 131
