Acknowledgements

It is with great pleasure that I express my deep sense of gratitude to Dr. S. Shashidhar (Professor and Director, School of Biosciences, Mahatma Gandhi University, Kottayam) and Dr. M. Haridas (Reader, School of Biosciences, Mahatma Gandhi University), for their invaluable supervision and guidance.

I am also grateful to Dr. C. V. Antharayose (Ophthalmologist, Little Flower Hospital, Angamaly), Dr. Kasi Visweesara Iyer, Dr. Vimala (Department of Nephrology, Medical College Hospital, Kottayam), Dr. Sailakumari B. (Department of Ophthalmology, Medical College Hospital, Kottayam), Dr. Jayakumar and Dr. Baiju (Medical College, Kottayam), for their help and valuable suggestions.

I am also thankful to the teaching staff of the School of Biosciences, Mahatma Gandhi University, for their encouragement.

My thanks are also due to Mr. Bose T. S., Mrs. Reji S. L. (Medical technologists) and other staff and members of School of Biosciences, for their help and co-operation.

I am also thankful to the research scholars of School of Biosciences, especially of the Physiological Chemistry Research Lab, for their help and co-operation.

Needless to say, this thesis would not have been possible without the total participation of all the subjects.

The Library and Administrative staff of the University were very helpful throughout my research work. I acknowledged them with gratitude.

The financial assistance as JRF from Mahatma Gandhi University and SRF from CSIR, New Delhi are gratefully acknowledged.

I would like to thank Mr. Robin, M/s Copy Write, Ettumanoor, for the perfect realisation in word processing and documentation of this thesis.

Last, but not the least, I express my deep sense of gratitude and salutations to my beloved parents, brothers and sisters, all of whose untiring and relentless support gave warm impetus and mental courage beyond the academic scene.

Sree kumar R.
