This work ...
As a homage to --------

Late Prof. V. S. Jaiswal
Banaras Hindu University

Whom, I was -------
Privileged to know, as
My Teacher & A Generous Mentor.
ACKNOWLEDGEMENTS

While the work presented in this thesis is my own, it would never have been possible without the help of numerous people who have given me immense support in many ways during my long and arduous five years of study. It gives me immense pleasure to acknowledge my heartily indebtedness to my supervisor and mentor Prof. Sudip Chattopadhyay for his affectionate inspiration, creative guidance, invaluable criticism and encouragement in just the right proportion that paved the way for successful accomplishment of this work. It was his enthusiastic research, which attracted me to join his laboratory and he gifted me the opportunity to work with him, which turned out to a completely different mindset ability to think critically, to ask the right questions, and to resolve the problems through experiments. I thank him for allowing me freedom and resources to pursue different lines of research. I just hope I can cultivate a fraction of knowledge that I perceived from him.

I express my heartly gratitude to Prof. Akhilesh Kumar Tyagi, Director, NIPGR for excellent leadership and an inspirational working environment provided in the institute. I would like to thank Council of Scientific and Industrial Research New Delhi, for the financial support. As no one person contains complete wisdom, I have been blessed to be a part of NIPGR scientific community by which a high level of excellence and commitment to research has been established far and beyond most other institutions.

I would like to thank to my lab members Shikha, Ritu, Sreeramaiah, Prasad, Nazia, Nisha, Vismita for learning environment with them which further strengthened my conviction to accomplish my commitment in research. I thank to Dr. Chandrashekhar Mallappa for the double mutant line and Hathiram to substantiate results produced in this work. I am very happy to extend my thanks to all the staff members and students of NIPGR, especially Negiji, for his help in whatever the way I needed, and also to Laxmikanth and Kamal for their timely assistance in every possible way. I am very delighted to express my thanks to CIF staff and Dr. Vinod Kumar Sharma for their all-possible inputs in this work.
My special thanks are due to my ex-colleagues and amazing friends Dr. Snehangshu Kundu, Dr. Rakesh Shukla and Dr. Vineeta Tripathi for their help during the initial period of learning, which has further increased my interest in research. I would like to show sincere gratitude to my friends Wankhede, Kunal, Rajiv, Neeraj, Parul and Swati for their help and support during my stay in NIPGR.

I owe a very special debt to my Grand parents, parents and family members for their sustained support to this endeavor, which was more arduous than anticipated. Last but not the least I would like to mention the buoyancy of Harshit, which helped me much to sustain in stressed hours.

Aparna Singh
