List of Tables

1.1 Remote Sensing Satellites of the World and their Sensors 6
1.2 Currently Operational Environmental Satellites 8
1.3 Satellites Imaging Systems that record Radiant Temperatures 8
1.4 Satellites Radar System (unclassified) 9
1.5 Area of South 24-Parganas District falling under different Coastal Zone Categories 35
3.1 Landuse/ Landcover classification system developed by NRSA 44
3.2 Measurement Requirements for Remote Sensing of Pollution 63
3.3 Useful Spectral Ranges for the Study of Water Quality 65
3.4 Salinity Indication on satellite imagery 79
4.1 Administrative units of South 24-Parganas District 101
4.2 Subdivisions and Thanas of South 24-Parganas District 102
4.3 Normals of Temperature and Relative Humidity (Alipore) 123
4.4 Normals of Temperature and Relative Humidity (Sagar Island) 124
4.5 Mean Wind Speed in km/h (Alipore) 125
4.6 Mean Wind Speed in km/h (Sagar Island) 125
4.7 Special Weather Phenomena (Alipore) 125
4.8 Special Weather Phenomena (Sagar Island) 125
4.9 Frequency of Annual Rainfall in the District (Data 1901-50) 126
4.10 Police station wise distribution of Sundarbans forest in the South 24-Parganas District 142
4.11 Decennial population growth in the South 24-Parganas District 145
4.12 Population density in the South 24-Parganas District 146
4.13 Literacy in the South 24-Parganas District 146
4.14 Distribution of population according to occupation 147
4.15 Block-wise status of water supply scheme in the South 24-Parganas District 148
4.16 Block-wise distribution of existing SSI units in the South 24-Parganas District 149
6.1 Detailed Landuse Pattern of the South 24-Parganas District 191
6.2 Areas Under Different Classes (by Unsupervised Classification) 199
6.3 Areas Under Different Classes (by Supervised Classification) 202
6.4 Different Vegetation Classes by NDVI Classification and Area under each Category 206
6.5 Analytical results of groundwater samples at different locations in South 24-Parganas 213
6.6 Correlation Coefficient Matrix of Groundwater Parameters in South 24-Parganas 215
6.7 Range of values of chemical parameters in the study area and WHO and Indian standards for drinking water 216
6.8 Classification of groundwater according to conductivity 216
6.9 Classification of water according to TDS and EC (after Hem, 1985) 217
6.10 Classification of groundwater according to chloride 218
6.11 Groundwater Quality Parameters for Irrigation purpose at different locations in South 24-Parganas 226
6.12 Classification of irrigation water for Salinity based on TDS and EC 230
6.13 US salinity laboratory classification of Irrigation water (Richards, 1954) 235
6.14 Classification of Irrigation Water on the basis of RSC (USSL Staff, 1954) 236
6.15 Relative Spectral Reflectance/ Emittance Pixel Values of Selected sites Showing Anomalous Groundwater Quality 237
6.16 Scenarios developed and used by the IPCC 248
6.17 Factors affecting or influencing the severity of coastal storms in South 24-Parganas, West Bengal 255
