CHAPTER 1: REVIEW OF LITERATURE 1-20
1.1. General introduction........................................ 1-5
1.2. Ingredients of pan masala and gutkha.................... 6-7
1.3. Mechanism of carcinogenicity in Gutkha and Pan masala. 8-10
1.4. Role of Reactive Nitrogen Species (RNS) in formation of cancer. 11-12
1.5. Harmful effects of Pan masala and Gutkha ingredients..... 12-14
1.6. Micronucleus................................................. 14
1.7. Formation of micronuclei................................... 15
1.8. Criteria for the identification of micronuclei............. 16
1.9. Comet assay.................................................. 16
1.10. Fluorescent in situ hybridization (FISH)................... 17
1.11. Oral submucous fibrosis (OSMF)......................... 17-18
1.12. Mechanism of pathogenesis for Oral Submucous Fibrosis 18-19
1.13. Status of Gutkha and Pan masala in India............... 19-20

CHAPTER 2: MICRONUCLEUS INVESTIGATION IN HUMAN BUCCAL EPITHELIAL CELLS OF GUTKHA USERS 21-26
2.1. Introduction.................................................. 21
2.2. Materials and Methods..................................... 22
2.3. Results....................................................... 23-25
2.4. Discussion................................................... 25-26
2.5. Conclusion.................................................... 26
*Advanced Biomedical Research 1(2): 1-4; 2012

CHAPTER 3: EVALUATION OF MICRONUCLEUS FREQUENCY BY ACRIDINE ORANG FLUORESCENT STAINING IN BUCCAL EPITHELIAL CELLS OF ORAL SUBMUCOSUS FIBROSIS (OSMF) PATIENTS 27-33
3.1. Introduction.................................................. 27-28
3.2. Materials and Methods..................................... 28-29
3.3. Results....................................................... 29-31
3.4. Discussion................................................... 32-33
3.5. Conclusion.................................................... 33
*The Egyptian Journal of Medical Human Genetics 14:189-193; 2013
CHAPTER 4: ASSESSMENT OF DNA DAMAGE BY PANMASALA, GUTKHA CHEWING AND SMOKING IN BUCCAL EPITHELIAL CELLS USING ALKALINE SINGLE CELL GEL ELECTROPHORESIS (SCGE) 34-41
4.1. Introduction .......................................................... 34
4.2. Materials and Methods ............................................. 35-36
4.3. Results ................................................................... 36-39
4.4. Discussion .............................................................. 40-41
4.5. Conclusion .............................................................. 41
* The Egyptian Journal of Medical Human Genetics 14:391-394; 2013

CHAPTER 5: EFFECT ON MICRONUCLEUS FREQUENCY AND DNA DAMAGE IN BUCCAL EPITHELIAL CELLS OF VARIOUS FACTORS AMONG PAN MASALA AND GUTKHA CHEWERS 42-61
5.1. Introduction .......................................................... 42-43
5.2. Materials and Methods ............................................. 43-45
5.3. Results ................................................................... 45-52
5.4. Discussion .............................................................. 53-55
5.5. Conclusion .............................................................. 56
Supplementay Tables .................................................... 56-61
*Oral Science International 12: 9-14; 2015

CHAPTER 6: DETECTION OF ANEUGENICITY AND CLASTOGENICITY IN BUCCAL EPITHELIAL CELLS OF PAN MASALA AND GUTKHA USERS BY PAN-CENTROMERIC FISH ANALYSIS 62-80
6.1. Introduction .......................................................... 62
6.2. Materials and Methods ............................................. 63-65
6.3. Results ................................................................... 65-67
6.4. Discussion .............................................................. 68-71
6.5. Conclusion .............................................................. 71
Supplementay Tables .................................................... 72-80
*Mutagenesis 1-5; 2014
