Acknowledgements

Foremost but not least, I would like to take this opportunity to express my sincere gratitude towards my supervisors, Dr. Suman Kumar Dhar and Dr. Gauranga Mukhopadhyay. When I came here to join the Ph.D. I was not confident to take this big opportunity but due to their novel guidance, co-operation, suggestions, and critics made me much confident and improved my scientific skills. I learnt from both of them, how to do the good science and definitely, it will help me in my further scientific career. These contributions are unforgettable throughout my life.

I would like to express my whole-hearted gratitude to Dr. Nirupam Roy Choudhury for his unconditional help. It is injustice to ignore his moral support and guidance throughout my research work. I found him beside me in my days of difficulties.

I would like to thank Dr Dhruba K. Chatteraj, Dr Subhasis Biswas, and Dr. Santunu Das Gupta for providing the bacterial strains and valuable suggestions for my research work. Their contributions are extremely helpful for my published research articles.

My special thanks to the faculty members of SCMM, Dr. Rakesh Tyagi and, Dr. Chinamay Mukhopadhyay for their guidance, supports and encouragements. I would like to give sincere thanks to Prof. Sudha Bhattachrya, Prof. Alok Bhattachrya, Prof. Rajendra Prasad, and Prof Kasturi Dutta for their constant help and supports.

I would also like to express my sincere thanks to my M.Sc. teachers Dr. Ashish Bhatnagar and Dr. Monica Bhatnagar. Their blessings and encouragement help me to buildup my career.

I don't have words to express thanks to my friend who helped me in finishing this work. I am fortunate enough to have friends like, Sanjay, Ashraf, Ram, Ashish, Atul, Sukrat, Jagannath, Absar, Nagendra, Saradhi, Ali Bhai, Subodh, Sanjay, Sudipta, Dola, Nupur, Vandana, Sanal, Dharmendra and Nirul.
I shall ever remember all the help extended by Parul for her valuable contributions in my research work. I cannot forget the good time that I spent with my batch mates Manveen and Nivedita.

I also want to thank my dearest friends Sudhakar and Prabhat who helped me to learn and start my work in the lab. I cannot forget their unconditional help to go out of the way.

Very special thanks to Nand Kumar and Briendraji for their technical help. It would have not been possible for me to do research without the laboratory assistance from Naresh, Rajesh, Deepak and Asha Ram.

Lastly but most important, my heartful thanks to my parents for their inspirations, encouragement, sacrifice and blessings that have brought me to this position. I am very unfortunate in the world that I lost my dearest mother forever but still I can feel her presence and love. I MISS YOU.

I would like to thank my family members. First of all, I cannot forget my better half Rekha for her encouragement, inspiration, and love helped me to complete my research work. My sincere thanks for my didi, jijaji, bhaiya, bhabhi and in-laws for their blessings and love.

I cannot forget the good moments that I cherished with Absar, Jagannath, and Saradhi on dinning table of Brahmaputra hostel.

Financial assistance from CSIR in the form of JRF and SRF is gratefully acknowledged.

I apologize to those whom I might have inadvertently forgotten to mention and acknowledge by name.
