LIST OF TABLES

Table 1: Some lysosomal storage disorders and their deficient enzymes.

Table 2: Reported ligands for MPR 300.

Table 3: Thermal Cycler Program

Table 4: List of primers used to obtain fugu MPR 300 sequences.

Table 5: Table showing different mRNA transcript lengths coding for MPR 300 from various species as indicated.

Table 6: List of primers used to obtain the sequence of fugu MPR 46

Table 7: Structural similarity among MPR proteins (MPR 300 & MPR 46) in the Vertebrates

Table 8: Reagents used for the preparation of resolving gel with different polyacrylamide concentration.

Table 9: Reagents used for the stacking gel.

Table 10: Current knowledge on the appearance of MPR proteins in evolution
