ACKNOWLEDGEMENTS

I wish to express deep gratitude to my supervisor Prof. Najma Zaheer Baquer for her scholarly discussions, patient guidance and constant encouragement for writing the thesis and providing all necessary facilities to carry out this work.

I am equally grateful to my co-supervisor, Prof. Kailash C. Upadhyaya for his guidance and useful suggestions during the course of this study. I am also indebted for his kind consideration to provide project fellowship so that this thesis could be submitted within stipulated time.

My thanks to the former and present Dean of the School of Life Sciences; to Prof. Ali Baquer whose benevolent advice kept me in enthusiastic spirit; to Dr B.L. Gupta for his constructive criticism; to my lab colleagues Askar, Dhananjay, Jaiprakash and Solomon for their stimulating presence in the lab and support. My special thanks to Raju for his help in proof reading the manuscript.

I also express my sincere appreciation to my friends J.P. Singh, Prasad, Praveen, Tiwari, Ranjan, Sameer, A. Chauhan, Siri Prakash Tanwar and Owais khan for their cooperation and to Kanchan for her technical assistance and competence in typing the manuscript.

I also thank to H. P. Sharma for his laboratory assistance. Mr. Avais Ahmad, B. A. Khan, Alexander and S. P. Sharma for their technical services.

My special thanks are due to Saini for photography and to Rafiq for his help in data processing; to Dr. Robert Barouki, France and Dr. Masataki Mori, Japan for providing cDNAs for AspAT and arginase respectively.
I gratefully acknowledge the University Grants Commission for financial support in the form of JRF and SRF.

No words in any language can convey my gratitude to my parents and relatives for their constant encouragement throughout my academic career. I owe heartful thanks to Mr. Arif Mohammad Khan and his family for the moral support rendered to me and their affectionate attitude which encouraged me all the time.

I am particularly grateful to Fatima my wife who as a fellow traveller, has provided constant support and help at all stages of the preparation for this thesis. Without her companionship this thesis would not have been submitted in the present form. Her perseverance and patience have enabled me to complete this work.

SALIMUDDIN
