

ACKNOWLEDGEMENTS

For Dr. G. L. Badam whose invaluable guidance and support saw this dissertation reach completion, I record my deep sense of gratitude and also thank him for showing confidence in me.

For late Dr. V. S. Wakankar who introduced me to Palaeontology. It was he who was instrumental in my undertaking the study of Vertebrate Palaeontology and taught me its relevance in Archaeology.

For Prof M. K. Dhavalikar, Prof S. B. Deo, Prof V. N. Misra, Prof S. N. Rajaguru and Dr. P. K. Thomas who were very kind and showed keen interest in the completion of this work.

For the library staff of the institute, for complying with unreasonable demands.

For Prof. Ashok Sahni of Punjab University, Chandigarh, my teacher in the art and science of SEM, who introduced me to such a fascinating field of research.

For Mr Shah, Director, Palaeontology Division, Geological survey of India, Calcutta for permitting me to study the fossil cervids housed in the Indian Museum. Dr Ayyasami of the repository section extended all possible help during the work at G.S.I.

For Prof. K. C. Jain, Vikram University, Ujjain, for allowing me to study the fossil collection housed in the

University museum.

For Mr. Chaturvedi, Asst. Curator, Bombay Natural History Society for allowing me to refer to the recent mammalian collection housed in the B N H S, Bombay.

For Sunil and Srikant, for the photographs.

For Mr Alam for help in the study of archaeological material.

For Sri Warke and Yoshiyuki for excellent diagrams and maps.

For Sri Abhyankar, Mr Nicholas Picardo and Prof. Bakare for prompt production of this work in the face of impossible deadlines.

For Shubha, Yoshiyuki, Sudeshna, Ashok, Ashok Hegde and Ko for their liberal criticism, constant help and encouragement.

Lastly but not the least for the support and encouragement from my parents, my family and my twin brother Sanjay for manifold support, which made this endeavour worthwhile.

VIJAY SATHE
