List of Tables	vii
List of Figures	ix
Acknowledgments	xiii
Certificate of the Guide	xv
Declaration	xvi
Abstract	xvii
List of Publications	xxiii
1 Introduction	1
1.1 Spectral Classification of Stars	4
1.2 Stellar Atmospheric Parameters	6
1.3 Infrared Astronomy	8
1.3.1 Observing in Infrared	11
1.3.2 Infrared Spectroscopy	15
1.3.3 Opacity Sources in Infrared	17
1.3.3.1 Continuous Opacity Sources	17
1.3.3.2 Atomic and Molecular Opacity	18

CONTENTS	iv
1.3.3.3 Molecular bands	19
1.4 Stellar Spectral Libraries	20
1.4.1 Libraries in Ultra-Violet	22
1.4.2 Libraries in Optical	24
1.4.3 Libraries in Infrared	27
1.5 GIRT (Gurushikhar Infrared Telescope) Library	29
2 Observations and Basic Data Reduction	33
2.1 Gurushikhar Infrared Observatory at Mt. Abu	33
2.1.1 NICMOS3 array	34
2.2 Selection of Stars in GIRT Library	36
2.3 Data Acquisition	37
2.4 Data Reduction	41
2.4.1 Preprocessing the Data	43
3 Near Infrared Stellar Spectral Library in J-band	46
3.1 Introduction	46
3.2 J-band Observations and Data Collection	49
3.3 Data Reduction and Calibration	53
3.4 J-band Spectra	55
4 Near Infrared Stellar Spectral Library in H-band	78
4.1 Introduction	78
4.2 H-band Observations and Data Collection	81
4.3 Data Reduction and Calibration	85
4.4 H-band Spectra	89

5	Near Infrared Stellar Spectral Library in K-band	112
5.1	Introduction	112
5.2	K-band Observations and Data Collection	115
5.3	Data Reduction and Calibration	119
5.4	K-band Spectra	123
6	Absolute Flux Calibration and Data Validation of the NIR library	143
6.1	Absolute Flux Calibration	143
6.2	Validation of the NIR library	145
6.2.1	Comparison with Synthetic Spectra	146
6.2.2	Classification with Artificial Neural Networks (ANN)	148
6.3	Future Work	153
	Appendices	154
A	Parameter files used in preprocessing of GIRT data	154
A.1	Conversion of images (FITS) to individual IRAF images	154
A.2	Resetting the image coordinate system	154
A.3	Detecting and replacing cosmic rays	155
A.4	Arithmetic on the image	155
B	Parameter files used in processing of GIRT data	158
B.1	Extract one dimensional sums across the apertures	158
B.2	Wavelength calibration	158
B.3	Assigning reference spectra	159
B.4	Dispersion correction to the spectra	159
B.5	Spectrum arithmetic	159
