

# Acknowledgments

---

I am extremely grateful to Prof. Ranjan Gupta and Prof. H. P. Singh, my guide and co-guide of the thesis. I am sincerely thankful to them for selecting the present project for my research, guiding me through difficult times and also for their constant encouragement throughout the course of this work. Working with them has been a pleasant, rich and a rewarding experience. My special thanks goes to Prof. N. M. Ashok without whose help the project would not have been completed. All of them are more than the teacher for me.

I deeply acknowledge the IUCAA for providing me extremely high class facilities right from the hostel, office room to the library and high performance computer center for my thesis work. I am very much thankful to Prof. Jayant V. Narlikar then the director and now emeritus scientist for his valuable time spend with us especially in the graduate school. I equally thanks to the Director Prof. Naresh Dadhich, Prof. Ajit Kembhavi, Prof. T. Padmanabhan, Prof. Varun Sahini, and Prof. Ramprakash for spending their time during the course of graduate school.

I sincerely thank the Astronomy and Astrophysics division of Physical Research Laboratory, Ahmedabad for providing more than 25 nights on the near infrared telescope at Mt. Abu. It was fun working with Sri. G. S. Rajpurohitji and Sri. Jinesh Jainji at the Mt. Abu Infrared Observatory. I duly acknowledge their help for my memorable observation nights ranged from January to May 2003.

I take this opportunity to convey my thanks to Prof. Pradeep Kumar, the

---

head of the department of Atmospheric and Space Sciences for his kind nature and support for all aspect of my relation with the department. I also thanks to Prof. A. D. Tillu, Prof. S. B. Khadkikar, Prof. P. N. Sen, Prof. K. C. Sharma, Prof. Karekar and Dr. Puranik who are always the part of supporting team.

I am sincerely indebted to Dr. Vinay B. Kamble, Director, Vigyan Prasar, for his encouragement and guidance. Without his blessings and support it would have been difficult to complete the thesis. I sincerely thanks to Dr. Subodh Mahanti, Scientist-F, and Sri. V. K. Joshi, Registrar, who always encourages me to go for new tasks. I also thank colleagues Dr. TVV, BKT, KDM, R. Nath, Kapil, Sandeep and Nimish for their help.

My sincere thanks are also due to Indian Space Research Organization (ISRO) for providing fellowship under a RESPOND project to my supervisors.

Personally, I would like say thanks to Atul, Sanjit, Humchand, Niraj, Vijay, Hemant, Shashikant for making my stay at IUCAA a wonderful and joyable one. I also express my sincere thanks to my classmates Makarand, Jaya, Aveek, Rupali, Kaustubh and Sandeep with whom I enjoyed my university days. I also express my thanks to Ravi, Sukanta, Eshankur and Partha for their kind help.

Specially, I express my deepest thanks to my parents because of whom I see the world today. I deeply bow to my parents-in-law as well, who are special to me. No words can feel the place of both the couples and hence I am dedicating my thesis to both the couples for my everlasting love and affection.

Finally, I thanks to my special person, friend, adviser, counselor and all-in-one my wife Ashwini without whose support nothing would have been possible for me. I also appreciate my son Aryan whose present age is not to understand the books but definitely he understands when I should be allowed to work.

Arvind C. Ranade
