Acknowledgments

It gives me great pleasure to have an opportunity to express my thanks to my supervisor, Dr. Arun K. Attri for his supervision, suggestion, constant help and encouragement throughout the course of this study. I am especially grateful to him for his patience and untiring efforts during the course of this research. I am equally indebted to my co-supervisor Prof. V. K. Jain.

I am thankful to Prof. D. K. Banerjee, Dean (SES), Prof. J. Subba Rao, former Dean (SES) and Prof. V. Rajamani, former Dean (SES), for readily providing me the adequate research facilities.

I sincerely thank Prof. C. K. Varshney, Prof. J. Behari, Dr. S. Mukherjee and Dr. P. S. Khilare for their help and suggestions, and Prof. V. Subramanian for providing the use of the vehicle during field trips. I am also thankful to Manoj for his co-operation.

It is not often that a task of this magnitude is accomplished single-handedly. Debts have accumulated along the way. I recognise the support and advice of Dr. V. T. Gajbhiye (IARI, Pusa, New Delhi) as invaluable. I also thank Prof. Agnihotri and Dr. Sharma for providing necessary help, especially the ‘standards’.

I am grateful to Mr. Gyan Batra, Chief, Nucon Engineers, for going beyond his means to help me throughout the course of study. I also like to thank Arun, Tiwarijee and other members of Nucon family.

I would like to express my thanks to my lab-mates and friends Bhaveshjee, Anita, Bhuvaneswari and especially to Anil for their invaluable assistance and moral support during this research work.
It is very difficult to forget the support of peer groups. Among my friends, I am especially thankful to Alok K. Das and Ranjay, who meticulously went through the proof-reading, and to Amar, Niraj, Alabh, Sujeet, Jeetendra, Manish and Pappujee for their help during sampling. I would also like to remember my friends Jasveer, Y. Kumar, Binod, Rajnath, Diwakar, Dileep, Sanjeev, Anupam, Krishna, Balachandran, Sunil, Archana, Shiva, G. C. Mishra, Pratap, Chitrasen, Pramod, Anup Das, Arun, Abhay, Gawali, Pranav and Usha.

My deep sense of gratitude goes to Nagendrajee for the help and support he has provided me throughout the research work.

I also like to thank Gajendrajee for helping me during sampling, Gaiwkwadjee and Sharmajee for their technical support, and Mr. Chopra (USIC) for constructing the sampler.

I feel very happy to express my feeling towards my family members - Bhaiya & Bhabhi, Didi & Jijajee, nephew and niece. I especially recognise my younger brother at this time, Anup, whose support is invaluable. I would also like to remember Babloo.

I also acknowledge the University Grants Commission for providing me financial support, the Senior Research Fellowship.

Last, but not the least, I express my heartiest gratitude to one, who feel closer to my heart.

AVINASH KUMAR
