BIBLIOGRAPHY

Abel. N. H. (1) Untersuchungen Liber die Reihe
\[ 1 + mx + m(m+)x^2/2 + \ldots \] Journal Für
die reine and angewandte Mathematik,
(Crelles), L(1826), 311-339.

Agnew. R. P. (2) The Lototsky method for evaluation of
series, Michigran, Match journal 4,
(1957) 105-128.

Cesaro, E (3) Surlo multiplication des series, Bulletin
des science, Mathematiques, 14(1890),
114-120

Dwivedi, G. K. (4) On a sequence of Fourier coefficients,
Annal, Soc, Math., Poloniaeaj, Commen,
Mathxv (1971) 61.

Fekete - M (5) Vizsgalatok a Fourier-Sovokrol,
Matematikaes Termesz, Ertesitok,
34(1916), 759-786.

Lal. S. N.  (18) On the Nörlund summability of Fourier series and the behaviour of Fourier

Lorentz, G. C. (22) Acta Mathematica 80-167 (1948),

Luan, L. S. (24) Summability of Fourier series and related series, and sequence by Logarithmic mean Namita. Math., 6,1,
(1973).

Ojha, M. K.  

(32) On the degree of approximation to a function by triangular matrix of its derived Fourier series Accepted for publication in the Academy of progress of Mathematics,

Pandey, B. N.  

Pati, T.  

Prasad. K.  

Rajagopal, C. T.  

(42) On the degree of approximation to a function by the Cesaro means of its Fourier series, Indian. Journal of Pure
and applied Mathematics (2) 3, (1971), 367-373.

Singh V. N. and Singh V. S.

Sinha, Rajesh. and Singh, Brajesh.

Szasz

Titchmarsh E. C.

(46) Theory of functions, 13 (2) (1939), 403.

Toplitz, O.

(49) Uberallgemeine Linear Mittelbildunger
Tripathi, L. M. and Lal, Shyam.

Tripathi, L. M. and Tripathi, M.

Tripathi, L. M. and Tripathi, V. N.

(52) On $(\bar{N},p_n)$ summability of the derived series of a Fourier series. In course of publication in the Academy of progress of Mathematics.

Varshney, O. P.

Vuckovic, V.

Woroni, G. F.

(55) Extension of the notion of the limit of the sum of terms of an infinite series,
