Acknowledgements

I feel privileged to express my deep sense of gratitude to my supervisor Dr. (Mrs.) Seshu Lavania, Reader in the Department of Botany, University of Lucknow, Lucknow, for her kind supervision and valuable guidance throughout the course of the present study. I am grateful to the Head of the Department of Botany, Lucknow University, Lucknow for the kind permission to work in the Department.

I wish to put it on record that I got an opportunity to work and learn the various technical aspects relating to the present study while working as a Project Assistant in a D.B.T. sponsored "In situ chromosomal identification of r-RNA gene families and genomic variation in the diploid and polyploid clones of major aromatic grasses (Cymbopogon spp.) and mints (Mentha spp.), under the supervision of Dr. U.C. Lavania at the Central Institute of Medicinal and Aromatic Plants (CIMAP), Lucknow. I am indeed very grateful to him for giving me the much desired opportunity to work in the said project, and imparting necessary training in research methodologies. Further, I feel obliged to the Director, CIMAP, Lucknow for the necessary permission to work at CIMAP. My special thanks are due to Dr. AA Naqvi for his valuable advice and help in qualitative analysis of the essential oil by G.L.C., to Dr. JR Bahl and his support staff for their multifarious help relating to cultural maintenance, and to Dr. Muni Ram for his time to time advice for optimum maintenance and in planning of field work.

I shall be failing in my duty, if I do not mention the whole hearted support of the staff of the Cytogenetics Division of CIMAP, where I spent a good deal of my time while working in the DBT
sponsored project that laid the foundation of the work embodied in the thesis. The Head of the Cytogenetics Division – Dr. H.K. Srivastava, Director Grade Scientist deserve my most sincere appreciation for his continuous encouragement, and expert advice from time to time. My lab mates in the Cytogenetics Division of CIMAP have been most valuable support in the pursuit of my research activities. I owe my sincere thanks to Mrs. Sarita Srivastava, Ms. Surochita Basu and Ms. Jyotsana Kushwaha who not only continuously helped me in experimental work, but also kept on alerting me of my responsibilities in the field, lab and library work. Timely help from Photography Division of CIMAP especially Mr. AP Dhiman, and technical lab and field support by Mr. Raghubind Kumar is a valuable contribution that facilitated due completion of this work. I feel highly obliged to my friends and colleagues, Mr. Gaurish Misra, Mr. S.M. Kushwaha and Mr. Mohd Rashid for their valuable and timely help, cooperation and moral support without which this task could not have been possible.

In the last but not the least I offer my respectful regards to my parents who remain a perpetual source of inspiration.

Dated 02.06.2004

(Nandeesh Kumar Misra)
