LIST OF TABLES

Table 1.1  Important naturally occurring atmospheric acids.
Table 1.2  Impact of changing acidity on fish species.
Table 1.3  Global production of sulphur dioxide (x 10^5 metric ton S per year).
Table 2.1  Elements, source chemicals and acids used for preparing standards for elemental analyses.
Table 5.1  Rate of oxidation of S(IV) in different rain water along with the concentration of trace metals at S(IV) concentration 5x10^{-3} mol/l, pH 4.00 and tempt. 30°C (±0.5).
Table 6.1  The reaction rates catalysed by different aerosols and the trace metal concentrations.
