LIST OF FIGURES

Fig. 1.1 Air pollution system.
Fig. 1.2 Global distribution of sulphur [mg(S)/litre] in precipitation.
Fig. 1.3 Global distribution of pH in precipitation.
Fig. 2.1 Location of sampling sites in the map of Delhi.
Fig. 3.1 Spatial and monthly variation of Na\(^+\) in rain water.
Fig. 3.2 Spatial and monthly variation of K\(^+\) in rain water.
Fig. 3.3 Spatial and monthly variation of SO\(_4^{2-}\) in rain water.
Fig. 3.4 Spatial and monthly variation of Ca\(^{2+}\) in rain water.
Fig. 3.5 Spatial and monthly variation of Mg\(^{2+}\) in rain water.
Fig. 3.6 Spatial and monthly variation of Fe ions in rain water.
Fig. 3.7 Spatial and monthly variation of Mn ions in rain water.
Fig. 3.8 Spatial and monthly variation of Cu ions in rain water.
Fig. 3.9 Spatial and monthly variation of Co ions in rain water.
Fig. 3.10 Spatial and monthly variation of Cd ions in rain water.
Fig. 3.11 Spatial and monthly variation of Zn ions in rain water.
Fig. 3.12 Spatial variation of Na\(^+\) and K\(^+\) in aerosols.
Fig. 3.13 Spatial variation of Ca and Mg in aerosols.
Fig. 3.14 Spatial variation of Fe and Mn ions in aerosols.
Fig. 3.15 Spatial variation of Co and Cu ions in aerosols.
Fig. 3.16 Spatial variation of Cd and Zn in aerosols.
Fig. 3.17 Spatial variation of SO\(_4^{2-}\) in aerosols.
Fig. 4.1 Concentration-time profiles of the uncatalysed oxidation of S(IV) in aqueous phase.
Fig. 4.2 Log-log plot of initial rate vs. concentration for the uncatalysed oxidation of S(IV).
Fig. 4.3 Reaction profiles for the oxidation of S(IV) at different pH.

Fig. 4.4 Reaction profiles for the oxidation of S(IV) at different pH.

Fig. 4.5 Log-log plot of rate vs. $[H^+]$ concentration for the uncatalysed oxidation of S(IV).

Fig. 4.6 Log-log plot of rate vs. $[H^+]$ concentration for the uncatalysed oxidation of S(IV).

Fig. 4.7 Log-log plot of rate vs. $[H^+]$ concentration for the uncatalysed oxidation of S(IV).

Fig. 4.8 Plot of the rate of oxidation of S(IV) (uncatalysed) vs. Na-acetate concentration.

Fig. 4.9 Plot of the rate of oxidation of S(IV) vs. EDTA concentration.

Fig. 5.1 Concentration-time profiles for the oxidation of S(IV) in rain water.

Fig. 5.2 Concentration-time profiles for the oxidation of S(IV) in rain water.

Fig. 5.3 Log-log plot of rate vs. S(IV) concentration for the oxidation of S(IV) in rain water.

Fig. 5.4 Concentration-time profiles for the oxidation of S(IV) in rain water at different pH.

Fig. 5.5 Log-log plot of oxidation of S(IV) vs. $[H^+]$ concentration in rain water.

Fig. 5.6 Concentration-time profiles for the oxidation of S(IV) in different rain water.

Fig. 5.7 Concentration-time profiles for the oxidation of S(IV) in different rain water.

Fig. 5.8 Concentration-time profiles for the oxidation of S(IV) in different rain water.

Fig. 6.1 Concentration-time profiles for the aerosol catalysed oxidation of S(IV) at different S(IV) concentrations.

Fig. 6.2 Log-log plot of rate of aerosol catalysed oxidation of S(IV) vs. concentration of S(IV).
Fig. 6.3 Concentration-time profiles for aerosol catalysed oxidation of S(IV) at different pH.

Fig. 6.4 Concentration-time profiles for aerosol catalysed oxidation of S(IV) at different pH.

Fig. 6.5 Log-log plot of rate of aerosol catalysed oxidation of S(IV) vs. [H+] concentration.

Fig. 6.6 Reaction profiles for the oxidation of S(IV) catalysed by different concentrations of aerosols.

Fig. 6.7 Log-log plot of rate of oxidation of S(IV) vs. aerosol concentration.

Fig. 6.8 Rate of aqueous phase oxidation of S(IV) catalysed by aerosols of different places.

Fig. 6.9 Concentration-time profiles for the oxidation of S(IV) catalysed only Leachate (L) and Leachate and Suspension of the aerosol (conc. 0.2 g/l).

Fig. 6.10 Concentration-time profiles for the oxidation of S(IV) catalysed by aerosols [Organic free (OF) and With organic (WO)].

Fig. 6.11 Plot of rate of aerosol catalysed oxidation of S(IV) vs. Na-acetate concentration of the buffer solution.

Fig. 6.12 Effect of increasing EDTA concentration on the aerosol catalysed oxidation of S(IV).
