ACKNOWLEDGEMENTS

It is my privilege to express my sincere and profound gratitude to my mentor, Dr Arvind K. Srivastava, Scientist, Division of Biochemistry, CDRI Lucknow, for his guidance, supervision, unflagging interest, critical comments and immensely valuable suggestions during the course of this research. My association with him augmented my patience and humility, and inculcated in me appreciation towards sustained effort in the development of vigorous scientific temperament. I also wish to extend my sincere gratitude to Prof Rolf D. Walter, Head, Division of Parasite Biochemistry, Bernhard Nocht Institute for Tropical Medicine, Hamburg (Germany) for his guidance, valuable suggestions and critical comments during the tenure of this study. At this juncture, I also wish to extend my sincere gratitude to my teacher Prof M.K. Misra, Department of Biochemistry, University of Lucknow, for his blessings, suggestions and constant encouragement.

I am grateful to Dr R.P. Tripathi, Scientist, Division of Medicinal Chemistry, CDRI, Lucknow, for his constant interest in our collaborative research, for synthesizing the chemical classes for the validity of chosen biochemical targets.

I wish to express my sincere thanks to Dr C.M. Gupta, Director, CDRI, Lucknow, Dr J.K. Saxena, Present Head, Division of Biochemistry, CDRI Lucknow, and Ex-Head Dr A.K. Rastogi for extending the necessary facilities and moral support.

I owe a great debt to my seniors Drs Savita, Deepak and Ravi for their suggestions and cooperation and thanks to my colleagues Rehan, Brajendra, Sapna, Akshilesh, Vishal, Poornima, Maya, Amar and Santosh for their constant encouragement. Ungrudged help and sincere support from Rumana is highly acknowledged.

I acknowledge the technical assistance from Sureshji for his much needed help throughout my study. Daily lab chore helps from Subhash is highly acknowledged.

My sincere appreciation goes to the entire CDRI faculty and the staff members who were ever helpful when approached.

Financial assistance from Volkswagen Stiftung, Hannover (Germany) and CSIR, New Delhi in the form of Research Scholarship and Senior Research fellowship, respectively is gratefully acknowledged.
I feel fortunate to have friends like Ashish, Shweta, Priti and Mahima whose ungrudged help, love and unflagging support bolstered me throughout this study. My efforts would remain incomplete if I fail to express my sincere gratitude and love to my father, brother and family members for their benediction, cooperation and affection. Special thanks are due to my mother, whose constant blessings, moral support and perennial encouragement bolstered me all the way during my studies. Finally, I gratefully dedicate my work to the invisible energy, the Almighty, who served as a beacon light during the course of this dissertation.
