ACKNOWLEDGEMENTS

I would like to take this opportunity to express my deep sense of gratitude to my supervisor Dr. Pramod K. Yadava for his guidance and constructive criticism during the entire course of this work. I am very grateful to Dr. Pramod. C. Rath for his advices and help.

I thank Dean. School of Life Sciences for providing facilities. I would also like to thank the administrative staff of SLS for help.

Receipt of clones related with certain genes of SOS regulon of Escherichia coli from Prof. D. W. Mount (University of Arizona, USA), Prof. H.K. Das (JNU) and Prof. S. K. Mahajan (BARC, INDIA) served as trigger for initial experiments and the same is gratefully acknowledged.

The basic vector pBLoT7 which was modified and used throughout the present study was received as a generous gift from Prof. Martin A. Billeter (University of Zurich, Switzerland). Protocols for in vitro transcription and general methods of molecular construction were adopted from thesis of Karin Kalin which also makes a very clear listing of materials and reagents.

I thank Prof. Asis Datta, Prof. K.C. Upadhyaya and Dr. S.K. Kar for allowing me to use their laboratory facilities, Prof. B.S. Srivastava and Prof. R.K. Saxena for encouragement and suggestive discussions.

I gratefully acknowledge the readiness and promise for material and instrumental help received from Dr. S.E. Hasnain (NII, New Delhi). I recall with gratitude the access I received from Dr. Shahid Jamil and Dr. Raj Bhatnagar of ICGEB, New Delhi for their laboratory facilities.

I thank my labmates Vincent, Neeraj, Ashutosh and Preeti for maintaining peaceful and working atmosphere in the Lab.

I am grateful to my colleagues Ramasare, Shiva, JP, Devinder, Jyothi, Anita, JP, Arshad, RK, Prasad, Arun, Nagendra, Praveen, Dharama, Andrew, Sanjay, Askar, Agam, Partha, Shiv Bahadur, Mayank, Abhay, Murthy, ID, Sanjeev, Mitali and Dhyan Chand for their help and support.

I especially thank Shiva, Nagendra, Praveen, Vincent, Neeraj, Agam, Partha, Hemant and Sonia for critical reading of the thesis as well as for valuable advices and Sanjeev for densitometric scanning of some of the autoradiographs.

A word of special thank to Mr. R.N. Saini for his excellent photographic work.

I am grateful to staffs of the Central Instrumentation Facility for all their technical help.

I thank the Bioinformatic Centre (JNU) staff for their whole hearted support in making cumbersome work easily manageable.

I also thank my laboratory attendents Bhagat Ram and Chhote Lal for their cooperation.

The present study was supported by grants received from University Grants Commission and Department of Biotechnology, Govt. of India.

Last but not least, my deepest gratitude goes to my parents, brother and sisters for their encouragement and immense support without which this work would not have been possible.

Ramesh S. Yadava
