# Contents

1 Introduction 1

1.1 A Brief History of Development of Finsler Geometry 1

1.2 Curves, Line Element 4

1.3 Finsler Space 5

1.4 Tangent Space, Indicatrix, Minkowskian Space 8

1.4.1 Tangent Space 8

1.4.2 Indicatrix 9

1.4.3 Minkowskian Space 10

1.5 Metric Tensor 10

1.6 Magnitude of a Vector. The Notion of Orthogonality 12

1.7 Connections and Covariant Differentiations 14

1.8 Cartan's Connection 16

1.9 Rund's Connection 19

1.10 Berwald Connections 20

1.11 Ricci and Bianchi Identities in a Finsler Space 22

1.12 Geodesics and Paths in a Finsler Space 25

1.13 Lie Derivative in \((M^n, L)\) 26

1.14 Special Finsler Spaces 30

2 On the Hypersurface of a Finsler Space 36

with the Special Metric \(\alpha + \frac{\beta^{n+1}}{(\alpha - \beta)^n}\)

2.1 Preliminaries 37
2.2  Induced Cartan Connection  
2.3  Hypersurface $F^{n-1}(c)$ of the Special Finsler Space  

3  The $L$-dual of a Generalized $m$-Kropina Space of Order Two  
3.1  The Legendre Transformation  
3.2  The $L$-Dual of a Generalized $m$-Kropina Space of Order Two  

4  On the Main Scalars of a Five-Dimensional Finsler Space  
4.1  Scalar Components in the Miron Frame  

5  Conformal Change of Five-Dimensional Finsler Space  
5.1  Preliminaries  
5.2  Conformal Change of Cartan's Connection  

6  Conformal Change Of Some Special Finsler Spaces with Constant Unified Main Scalar  
6.1  Preliminaries  
6.2  Conformal Change of Some Special Finsler Spaces  
6.2.1  Conformal Change of C-Reducible Finsler Space  
6.2.2  Conformal Change of Semi-C-Reducible Finsler Space  
6.2.3  Conformal Change of $C^2$-like Finsler Space
