It is a matter of great privilege for me to have an opportunity to extend my gratitude to those remarkable persons who helped me in my quest for knowledge and contribution in this field.

First and foremost, I would like to express my appreciation and gratitude to my research supervisor Dr. Lakhwant Singh, Professor, Deptt. of Physics, Guru Nanak Dev University, for his guidance, motivation and constructive criticism without which this work would not have reached its present form. His valuable suggestions and words of encouragement were key to my success.

I pay my sincere indebtedness to Dr. Anupinder Singh for his scientific inputs, constant motivation and elderly support during the course of my thesis. I heartily thank him for persistent interest in my work with invaluable guidance.

I take this opportunity to express my deep respects to Dr. Rajesh Punia for his guidance, valuable discussion and the help provided in data analysis. I am also thankful to Prof. S. Murugavel, Department of Physics and Astrophysics, University of Delhi, for providing the facility to perform Dielectric measurements.

I extend my sincere word of thanks to Head, Department of Physics, Guru Nanak Dev University, Amritsar, for providing all the necessary facilities to carry out the research work.

I express my thanks to the Instrumentation Centre, Guru Nanak Dev University for providing the characterization facility. Also, special thanks to the faculty members and administrative staff for their kind help as and when needed. Financial assistance from University Grants Commission (UGC) in the form of BSR fellowship is gratefully acknowledged.
Thanks to my seniors Dr. Navjeet Kaur, Mrs. Sonika, Dr. Sukhnandan Kaur and Dr. Vibha Chopra who helped me initiate my journey into research. Also, acknowledging my lab-mates Ms. Manpreet, Vandana, Anumeet, Randeep, Aanchal, Sunil Kumar and Jaswinder Pal Singh for maintaining a cordial & cooperative environment in the lab. They deserve sincere thanks and acknowledgement for their help and support. Special thanks to my friends Jasmeet Kaur, Prabhjot Singh and Amandeep Kaur whose company made the tenure of work joyful.

I owe my deepest gratitude towards my husband, Kushal Gupta, who showed enormous confidence and patience in me and helped me in overcoming the anxieties associated with the work.

This work would not have been possible without the timely help and motherly care & love, bestowed on me by my mother-in-law. I would like to thank my in-laws for understanding my commitment towards my research and providing their constant support.

For me it is beyond the limit of words to express my feelings towards my beloved parents for being the soul of my life. Without their constant encouragement and support, I could not have voyaged a long way in my academic career. Thanks to my sister and brother for their love and care.

And lastly, nothing is possible without the light of knowledge showered upon all of us by The Almighty. I am thankful to Him for giving me strength and patience to complete this thesis.
