ACKNOWLEDGEMENTS

First and foremost, I would like to thank my Father, Late Mr. Sudarshan Upadhyay, for making me what I am. I recently lost him, however, his encouraging words are still heard by me & his happy and proud face is still smiling at me and showing me the right path of life, as always.

Words are scarce for me to express my thanks to my former guide, Dr. (Prof.) J.S. Sandhu, who constantly motivated me and guided through all the stages of my thesis. It was his efficient and knowledgeable supervision, that I could understand the depth of this research and do it.

I am immensely grateful and thankful to my Guide, Dr. (Prof.) Shweta Shenoy for all the efforts that she has put for the final stages of my work. Without her proper guidance, it was impossible for me to complete my research in the correct way. I thank her for all the pain she took to help me out and submit my thesis in time.

The other pillars of strength for me were Dr. Amrinder Singh and Dr. Jasmine, helped me out whenever and wherever I needed them in every possible way. Their supportive and friendly gesture would remain unforgettable for me.

Another name that needs a special mention is Lt Col Puja Dudeja. She is not only my good friend and well wisher, but also the sole statistician cum advisor of my research work. Her contribution has been instrumental in enabling me reach this stage.

Special thanks are also due to Sub Kishan Lal, Sub Manoj Kumar, Hav Naveen Chand and the entire staff of Sports Medicine Centre, Roorkee, who helped me out with the work.

My wife, Dr Shraddha Raj, my daughters Aadya and Shaivi, and my entire family have been pillars of strength for me. I dedicate my work to them.

Vivekanand Upadhyay
