ACKNOWLEDGEMENTS

It is my utmost pleasure to express my gratitude and thanks to my supervisor Dr. Jayashri Devi Sharma, School of Environmental Sciences, for her constant guidance, comments and encouragement. This work has gained immensely from her vital observations, during our field trips together in the Thar Desert and meticulous scrutiny of the data collected and the formulation of text of this thesis. It has resulted in a growing understanding of applications between our different fields of education i.e. botany and medicine during our attempts at ethnobotany and medicinal ecology.

I thank the Director, Malaria Research Centre for allowing me to undergo a training during December 1996 on in vitro cultivation of malaria parasite in Dr. C. R. Pillai’s laboratory. I also wish to express my sincere gratitude to Dr. C.R. Pillai, Assistant Director, Malaria Research Centre for condescending to be my co guide and for his constant support, advice, guidance, and valuable comments.

I would like to express my gratefulness to the staff of URMUL, an NGO in Rajasthan, particularly (late) Sanjay Ghosh, Madhavan and Anubha for assisting in field work and collection of Calotropis procera and hosting my stay along with my supervisor at Bikaner. We also had occasion to have fruitful discussions with Dr. D.N. Sen (J.N. Vyas University, Jodhpur), Emeritus Professor, Dr. M.M. Bhandari (J.N. Vyas University, Jodhpur), Dr. Suresh Kumar (Central Arid Zone Research Institute, Jodhpur), Dr. P.K. Dham (Director, Desert Medicine Research Centre, ICMR, Jodhpur) which resulted in formulating our plan of this study.
I deeply thank Dr. Sukh Dev, an eminent retired scientist, National Chemical Laboratory, Pune for his personal interest, invaluable suggestions throughout the study and for providing me the purified compounds from the plants *Calotropis procera* and *Commiphora wightti* from his individual collection.

The phytochemical screening was performed with the advice of Dr. Mohhamed Ali and with the help of Mr. R. Ramchandran, (Research scholar) in the Department of Pharmacognosy and Phytochemistry, Faculty of Pharmacy, Jamia Hamdard University, New Delhi for which I am grateful.

I deeply thank Dr. C. Usha Devi, Senior Research Officer, MRC for discussions at times whenever required and also the staff of Malaria Parasite Bank, Malaria Research Centre for training in maintenance of *Plasmodium* culture and parasite counting especially Mrs. Sangeeta Arora, Mr. Chand Singh, Mr. P.R. Chawla and Mr. Md. Yasin, for their immense help during the culture experiments. I sincerely thank blood bank, All India Institute of Medical Sciences, New Delhi for providing blood whenever required. I would also like to thank Dr. Sudha Bhattacharya, Molecular Biology Lab, SES for providing me with the *Entamoeba histolytica* cultures.

I thank Dr. Amit Pandey, Malaria Lab., ICGEB, New Delhi for providing the standard antimalarial drugs and Dr. Amir Azam, Chemistry Department, Jamia Milia Islamia, Delhi for providing Metronidazole. I am deeply grateful to Prof. J. Subba Rao, Prof. V.K. Jain and Dr. D.N. Rao for their time to time in help in statistical analysis.
I express my gratefulness to the University Grants Commission for providing financial assistance through Jawaharlal Nehru University, which facilitated this work.

Thanks are also due to Mr. Shan Mohammed, School of Environmental Sciences for the help rendered in laboratory experiments. I am indebted to many friends who have supported me during the period of this research work in many ways and I owe a debt of gratitude to each of them. Feelings of warmth and acknowledgement are also due to Rupa, Rachna, Rama, Rajeev, Anoop, Archana, Rani, Anna, Paramita, Debika for helping me in various ways whenever required.

Finally I bow my head in humble gratitude to all my family members particularly my parents and in-laws without whose blessings this work would have never reached its successful completion. They have all shown a lot of patience, support, understanding, encouragement, sacrifice and love whenever required.

Finally I cherish most dearly my husband Basant for his constant love, affection, encouragement, and support which saved me from losing heart and ultimately enabled me to finish my work. In fact it was with his computational skills that my thesis has materialised and is in a presentable state.

Poonam Sharma
