ACKNOWLEDGEMENTS

It is a great pleasure to acknowledge my heart-felt gratitude to my Supervisor Dr. Sachidanand Sinha. He not only corrected my flaws with great care and attention but inspired me with much-needed assurance till the last moment of this work. I really don’t know how to translate my sense of gratefulness to him. It is to him that I dedicate this work.

I would be failing in my duties if I don’t mention Prof. Amitabh Kundu’s contribution in this field. It is because of him that I was inspired to take up a sensitive topic like ‘Aspects of Distribution, Accessibility and Utilization of Health Care Facilities in Urban Delhi’.

I am extremely grateful to Prof. Sudesh Nangia, for her consideration and encouragement, which to a substantial extent, gave me an opportunity to improve upon this thesis.

My heart felt thanks goes to Pratishtha, Vijay, Varghese, Karabi, Dinesh, Paromita duo, Poonam, Chandana, Rehana, Kumud, Reshmi, Shailaja, Disha, Sushma, Firdausi, Priti Rahman, Vijaya, Kim and In Kyong Lee, Mr. Kapur and his family, Chir.moy nath and many others for their timely help and moral support.

A special note of thanks will definitely go to Mohan Rawat, Govind Rawat, Narayan Mahori, Harish and Manju Deshawal who painstakingly took up the job of typing.
