# Table of Contents

List of Abbreviations i  
List of Figures iii  
Synopsis v  

**Chapter 1  Molecular Signaling in memory** 1  
1.1 Introduction 1  
1.2 Synaptic plasticity and memory 1  
1.3 Learning and memory in hippocampus 5  
1.4 Models of learning and memory: LTP and LTD 8  
1.5 Why mRNA and protein synthesis? 11  
1.6 Role of temporal patterns of Input 13  
1.7 Inputs triggering calcium signaling in a neuron 14  
1.8 Signaling of translation 18  
1.9 Signaling of transcription 21  
1.10 Spatial transport of mRNA and protein 24  
1.11 Questions addressed in thesis 26  
1.12 References 28  

**Chapter 2  Signaling of translation** 36  
2.1 Introduction 36  
2.2 Methods 38  
2.3 Results 39  
  2.3.1. Parameterization of sub-modules 40  
  2.3.2. Validation of the composite model 56  
  2.3.3. Parameter Sensitivity Analysis 58  
  2.3.4. Steady-state responses 65  
  2.3.5. LTP and LTD stimuli 68  
  2.3.6. Feedback and bistability 73  
2.4 Discussion 77  
  2.4.1. Where is the switch? 78  
  2.4.2. Self-modifying machines 78  
2.5 References 81
Chapter 3  Signaling of transcription

3.1  Introduction 86
3.2  Materials and methods 89
3.3  Results 91
  3.3.1. Parameterization of sub-models 94
  3.3.2. Parameterizing the composite model 109
  3.3.3. Parameter Sensitivity Analysis demonstrates robustness of model. 113
  3.3.4. Different pathways mediate calcium dependent mRNA synthesis. 118
  3.3.5. BDNF raises mRNA synthesis when combined with LTD, but not LTP, stimulus 118
  3.3.6. The model predicts the outcome of pathway inhibition experiments. 119
  3.3.7. mRNA and upstream pathways exhibit modest tuning to interstimulus interval 120
  3.3.8. mRNA transcripts are differentially and combinatorially synthesized depending on stimulus pattern 121
  3.3.9. Simultaneous input patterns sum non-linearly to give rise to novel combinatorial mRNA expression. 124
3.4  Discussion 126
  3.4.1. Somatic pattern integration 127
  3.4.2. Other layers of decoding 129
3.5  References 130

Chapter 4  Signaling of transport

4.1  Introduction 138
4.2  Methods 140
  4.2.1. Electrophysiology 140
  4.2.2. Fixation and sectioning of slices 142
  4.2.3. Fluorescence in situ hybridization 143
4.3  Results 144
  4.3.1. Plasticity induction in hippocampal slices 144
  4.3.2. Localized activation of CA1 147
  4.3.3. Fluorescence in situ hybridization 148
4.4  Conclusion 153
4.5  References 153
Chapter 5  Summary and Future directions  156  
5.1  Summary  156  
5.2  Future directions  157  
5.3  References  159  

Appendix 2.1  Parameters used for simulation of protein synthesis model  
Appendix 2.2  Complete model reaction schemes and parameters of protein synthesis model  
Appendix 3.1  Parameters used for simulation of mRNA synthesis model  
Appendix 3.2  Complete model reaction schemes and parameters of mRNA synthesis model  
Appendix 3.3  Complete model reaction schemes and parameters of an alternate model for mRNA synthesis.
