Acknowledgements

First and foremost, I am thankful to the Almighty for the blessings, which gave me enough courage and patience to complete and accomplish my doctoral work.

The journey though not a smooth one was challenging and yet interesting due to encouragement, support and advice from many people. Here I take this opportunity to acknowledge all those people whose guidance, direction, help and above all selfless contributions making this journey of mine a memorable experience. Writing down their names under the formal heading of “Acknowledgement” might not do justice to their contribution, but in the times to come those names will remain in my memories afresh to cherish those priceless moments.

At the foremost, I would like to extend my heartfelt gratitude to my thesis supervisor Dr. J. Nagaraju for his conducive criticism, utmost freedom, unconditional support, guidance and encouragement to do this challenging work. I really cherish hours of long discussions with him about my research problems and about how science should be believed, how a graduate student can emerge as an independent investigator and lots of talk about science in India and abroad. Words are not enough to thank him for the independence and constant support he provided. Hence, I dedicate my thesis to him.

I am very thankful to Dr. K.P. Arunkumar, who supported me to finish my thesis in the absence of Dr. J. Nagaraju.

I would like to express my sincere gratitude to CDFD director, Dr. J. Gowrishankar, Dr. Sekhar Mande (now NCCS director), Dr. Ranjan Sen and Dr. Sanjeev Khosla for their kind support.

I have been fortunate to join a lab which was having a reputation of supporting independent thinking and to work with free will. It gives me great pleasure to thank all my seniors, Dr. Sathish, Dr. Mrinal, Dr. Jayendra, Dr. Reddy, Dr. Arun, Dr. Jyoti, Subbaiah and Asha. I am highly grateful to all my labmates; Dr. Satya, Varsha, Muthulakshmi, Annapurna, Srividya reddy, Archana, Vaishna, Sabahat, Jayavardhana, Murli, Adarsh, Manju, Swarna, Vijaysarathy, Santosh, Shweta, Srividya, Dr. Nagraj, Dr. Rajendra, Rohit, Kushal, Rajeev, Sobhan Babu, Ramesh Babu, Chandrashekhar, Balraj and Vijay bhaskar.

Thanks are also due for my enchanted juniors, Deepa, Sitalakshmi, Gopi, Vandana, Akanksha and Parveen.

My heartfelt thanks to my batchmates Amit, Amitabh, Sashi, Nandan, Rachita, Nazia, Arpita, Sidharth, Rajesh, Ramaswami, Suresh, Sapan, Swarna, Babul, Atul and Garima. I am also thankful to these people who supported me during my stay in CDFD, Gaurav, Shanti, Jamshed, Gazhala, Naura and Vishal.
I really want to extend my special gratitude to these colleagues who were very special for me Varsha, Annapurna, Jyoti, Asha, Suresh, Gopi and Vandana.

Obtaining a PhD is a milestone in any scientist’s life and it was a journey, which actually started in Delhi with my other two musketeers, Manish, Ankur and me making us three.

Finally, I am really thankful to Council of Scientific and Industrial Research (CSIR), for providing research fellowship and CDFD for financially supporting my visit to Banff, Canada, for attending Keystone Symposium.

I am indebted to my parents, who encouraged me throughout by giving moral support, faith, confidence and always being unconditional supporter during these years, to do research, which was very unconventional in their circumstances. My family has always been my pillars of strength. Words cannot describe their contribution made to see me reach this goal.
