CHAPTER-III : IDENTIFICATION OF BASIC PLANNING UNITS AND PLANNING FOR THE SOCIO-ECONOMIC SERVICES

Spatial organisation of Service centre, identification of service centres, centrality of the centres, methodology adopted in the present work, hierarchy of service centres, demarcation of service area units and proposals for improvement in service centres. Educational services and planning for the development of educational services, health services and recommendations for the development of health services. Proposals for the development of socio-economic services. References.

CHAPTER-IV : PLANNING FOR THE DEVELOPMENT OF TRANSPORT AND COMMUNICATION FACILITIES

Road transport, road accessibility and planning for road development. Railways passanger traffic flow and goods traffic flow. Communicational services and measures in communicational services. References.

CHAPTER-V : PLANNING FOR THE DEVELOPMENT OF AGRICULTURE

Operational attributes : input of man and animal power, mechanical power, manures and fertilizers. Problems, prospects and planning, cropping pattern, Crop rotation system, production of the mainfood crop, cropping intensity, regional imbalances in the level of production, agricultural efficiency, dry land agriculture. Size distribution of holdings in sample-villages, and Planning for the development of agriculture. References.
CHAPTER-VI: PLANNING FOR THE DEVELOPMENT OF
INDUSTRIAL INFRASTRUCTURE 164-186
Industries and their types, cottage and small
scale industry, spatial distribution of
industries: General engineering, forest based
industries, agro-based industries and other
industries, industries and industrial
employment, industrial intensity,
recommendations for industrial development,
industries based on the waste materials,
infrastructural support. References.

CHAPTER-VII: INTEGRATED PLANNING PROPOSALS 187-215
Planning for improving related physical
problems: Shape of the administrative units,
 improvement of drainage systems, floods and
droughts, Soil-erosion and its conservation.
Agricultural situation and development
potential: elimination of misuse of land,
programme to develop irrigational facilities
and electrification, proposals for the fertilizers,
manures and HYVs, Semi-mechanisation of
agriculture and development of agricultural
allied activities, Planning for industrial
development, Proposals for Socio-economic
services, Spatial organisation of service
centres for 2011 A.D. Transport system.
References.
