ACKNOWLEDGEMENT

I am extremely thankful to Dr Lalji Singh, my research supervisor for his keen interest in my work, for thoughtful suggestions and untiring guidance. His meticulous, untiring and perfectionist approach towards work is worth emulating. Among numerous things I learnt from him, the powerful technique of In Situ Hybridization was taught to us by him as a piece of meticulous and beautiful art.

With a deep sense of gratitude, I thank Dr. P. M. Bhargava the founder Director of our laboratory for the work ethos and for creating an excellent atmosphere for research in CCMB. The graduate students owe him a lot for the sense of belonging to the work, the Institution and the excellent Science, that he instilled among us. He has been a constant source of inspiration and strength to all the research students.

I would like to extend my thanks to Prof. H. Sharat Chandra, our former Director for his encouragement and support. I would also like to thank Prof. D. Balasubramanian, our present Director, for his constant support and encouragement, specially during the later stages of my stay in CCMB.

I am grateful to Dr. Kshitish Majumdar for all the help provided to me in various forms. Most importantly, I am thankful to him for laboriously and meticulously going through a number of rough drafts of my thesis and giving thoughtful suggestions to bring it to the present form.

For introducing me to the intricacy and beauty of Drosophila, the credit goes to Maninder. I have learnt a lot from him during our association in the early stages of my Ph. D. He has been my constant friend and mentor.

To widen my perspective of Science in general and Biology in particular, I give all the credit to Girish, Rakesh and Raghavendra- members of the 'Cell Club', who were the moving forces to make the Sunday-seminars a memorable experience of the life time.

Rachel and Ramesh have helped me in a number of ways and at different times throughout my stay in CCMB. I would like to thank them for each and every gesture of help and encouragement provided. For providing a home away from home, I am thankful to Ramesh, Sangeeta and their family, and to Arjumand and her family.

I gratefully acknowledge the help of the staff of various supporting services of CCMB. Much of the work reported in this thesis would not have been possible in the absence of the untiring support from Photography and Refrigeration Sections. Special thanks are due to Rehman and Ramesh for their help and support with a smiling face. The warm help received from the staff of Laboratory services, Instrumentation, Electrical section, Workshop, Administration, Stores
and Purchase, to mention a few, is greatly acknowledged. Prakash has put in extra efforts to complete the xeroxing of my thesis in a record time.

In making my stay a memorable experience, at West Wing 3rd floor, the credit goes to all the former and present members of our group. My heartfelt and sincere thanks to all of them. I thank Sridevi, Annie, Renu, Geetika, Maninder, Sanita, Rajyashri, Shirly, Raghavendra, Naren, Ramesh, Rachel, Radha, Mala, Seema, Ravinder, Nasser, GV, Chandak, Prabhjeet, Thangraj, Sanjeev, Trupta, Srikanth, Bala, Pandian, Kathirvel, Satish, Vanya, Deepa, Dibeyendu, Bhupender, Shanker, Priscilla, Milind, Moinak, Chandrika, Anju, Zeenath, Hema, Mehar, Sukanya, Jaggan, Kanhaiya, and all others for rendering help and for keeping a lively atmosphere. The help from Narsing, Ashok, Vishwanadham in making fly-food and in maintenance of fly lab is gratefully acknowledged. The support provided by Suryanarayana in making litres of media and in many other forms, has been of great help in executing the experiments quickly and smoothly, for which I owe him a special word of thanks and appreciations. I am extremely thankful to Thangraj for all the help in automated sequencing and the use of related soft-ware.

I am fortunate to have had the wonderful company of Charun, Shashi, Murali, Datananda, Papavinash sundaram, Patil, Mohanty, Girish, Rakesh, Nambi and Sham Sunder who all have helped me in a number of ways, have been my buddies during my many difficult moments, and for their ever pouring friendly advice, guidance, moral support and strength. Shashi gave me days and days of free usage of computer, sometimes even at the cost of his own work. I am very greatful to him for that. I thankfully acknowledge the help from Shuvendru and S.K. Mishra.

Lastly, I have no word to express my gratitude towards my parents, my sisters and their respective families towards me during all these years for the untiring support, encouragement, love, patience and understanding shown by them. I am afraid that any word used to express my gratitude will never be able to describe my heart-felt thankfulness, so I will not attempt it even.

Finally, I thankfully acknowledge the financial support provided by CSIR and CCMB.
