Acknowledgment

My sincere thanks to Prof. G.V. Singh, our Dean, for providing me the help and assistance required for carrying out the research.

I am thankful to the student members of Telecommunication Consultants India Limited, who gave me an opportunity to discuss and experiment my ideas in a very stimulating atmosphere.

I am also indebted to the librarian and the staff of Jawaharlal Nehru University Library and Indian Institute of Technology (Delhi) Library.

My sincere thanks to Rajesh Bhat who was always helpful with his unsparing comments on my formulations.

I take this opportunity to thank my parents for their love, care and encouragement throughout.

Ballu and Dinu were always there to help me out in critical times. I owe a special thanks to friends in JNU, especially, Talluri, Venky, Nagesh, Rocket, Pranab, Asif, Milind, Sudeshna, Sohini, Maha and Battu.

Though Sriní and Amit did their best to keep the draft mistake proof, it is me who is responsible for any error that might have crept in the work.

Finally, I acknowledge my indebtedness to my supervisor, Prof. R.G. Gupta, for not only introducing me to an exciting area of research, but also helping me to develop critical ideas related to the area. Work on this thesis would not have been possible without his encouragement, affection, and occasional reprimands.

Sunil Raina.
