

LIST OF TABLES

- 2.1: Lithostratigraphic succession of Pre-Vindhyan rocks of Aravalli region.
- 2.2: Lithostratigraphic sequence of Delhi area.
- 3.1: Methods of chemical analysis.
- 4.1: Major and Trace element chemistry of quartzites.
- 4.2: REE chemistry of quartzites.
- 5.1: Features of weathering rinds on the quartzites.
- 5.2: Major and Trace element chemistry of weathering rinds.
- 5.3: REE chemistry of weathering rinds.
- 6.1: Visual characteristics of alteration products (sands and clays).
- 6.2: Mineralogical composition of alteration products (sand and clays).
- 6.3: Major and Trace element chemistry of alteration products (sands and clays).
- 6.4: Correlation matrix for the chemistry of alteration products (sand and clays).
- 6.5: REE chemistry of alteration products (sand and clays).
- 7.1: Grain size distribution in the Delhi ridge sediments (DRS).
- 7.2: Mineralogy of the Delhi ridge sediments and comparison with the loess mineralogy.
- 7.3: Major and Trace element chemistry of Delhi ridge sediments.
- 7.4: REE chemistry of Delhi ridge sediments.
