ACKNOWLEDGEMENTS

This thesis is the end of my journey in obtaining my Ph.D. I have not travelled in a vacuum in this journey. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my well-wishers, my friends, colleagues and various institutions. At the end of my thesis I would like to thank all those people who made this thesis possible and an unforgettable experience for me. At the end of my thesis, it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me.

I am extremely indebted to my guide Dr. Anindita Ukil, for providing necessary infrastructure and resources to accomplish my research work. This work would not have been possible without her guidance, support and encouragement. Under her guidance I successfully overcame many difficulties and learned a lot. Her unflinching courage and conviction will always inspire me, and I hope to continue to work with her noble thoughts. Apart from experimental guidance, I also learned from her how to present scientific works.

I warmly thank Dr. Pijush K. Das, for his valuable advice, constructive criticism and his extensive discussions around my work.

Ph.D students often talk about loneliness during the course of their study but this is something which I never experienced in my lab. I am indebted to my colleagues for providing a stimulating and fun filled environment. My thanks go in particular to Purnima (Purnima Gupta) with whom I started this work and many rounds of discussions on my project with her helped me a lot. I am ever indebted to Kuntalda (Dr. Kuntal Ghosh) and I admire his distinguished helping nature. My special appreciation goes to Amrita (Amrita Saha) for her friendship and encouragement. My juniors Moumita (Moumita Basu), Shriya (Shriya Saha) and Jayita (Jayita Barua) deserve special mention here for their constant support, motivation and help.

I am grateful to my supervisor for giving me opportunity to work in the wonderful laboratory of Dr. Pijush K. Das at Indian institute of chemical biology, where I fortunately came in contact with lot of people, whose contribution is priceless in my Ph.D life. The first name comes in mind is Dr. Supriya Srivastav. I am greatly indebted to her for teaching me all the laboratory techniques I have learnt and helping me to awake my scientific insight. I convey my special thanks to my senior colleagues in this lab, Dr. Susanta Kar, Dr. Arunima Biswas, Dr. Gunjan Sharma, Dr.Writoban Basu Ball, Dr. Shreyashi Palit, Dr. Madhuchanda Mukherjee, Mr. Amit Vij. Without their support and guidance my thesis work could not be possible. My special thanks to Shalini and Anand, who never hesitated to help me whenever needed. I would like to thank Artidi, Deepakda and Biswajitda for their constant support.
I would like to express my special appreciation and thanks to all of the faculty members of Department of Biochemistry for their help and nice co-operation. They not only assisted to complete my Ph.D work but also help to build my scientific insight from the very beginning of my master’s course.

I would also like to thank all of the scholars and administrative staffs of Department of Biochemistry and DBT IPLS.

Financial assistance provided by the Department of Biotechnology, University Grant Commission and Indian council of Medical Research to me is gratefully acknowledged.

My friends Prativa, Siddhi, Madhurima kept me going with their support and love in the worst of times.

Above and beyond all, my heartfelt gratitude to my parents, my elder sister Nabanita, my brother-in-law Utpalda, my niece Riddhi for their much needed support, patience, understanding, and encouragement in every possible way. I am also thankful to my husband Debasis and my brothers Rahul and Amlan. Their endless love, priceless, perpetual, indispensable help, support and everything made all this possible.

I sign off by acknowledging all my near and dear ones whom I could not mention due to lack of space. Thank you all.
