Acknowledgements

“You have to dream before your dream comes true”-A.P.J.Abdul Kalam.
This journey is a dream come true for me and it would not have been possible without
the tremendous support from many people. At the very beginning I take this
opportunity to show my sincere gratitude to my supervisor Dr. Sandhya Rekha
Dungdung, Senior Principal Scientist & Head of Sperm Biology Laboratory, CSIR-
Indian Institute of Chemical Biology. Her guidance, experienced advice, liberty to
work, wholehearted involvement, enthusiasm and unparallel patience enabled me to
complete this thesis.

I am also grateful to Dr. Gopal Chandra Majumder, Honorary Scientist,
CRCT, Jadavpur University and Dr. Debdas Bhattacharyya, Senior Scientist, CRCT,
Jadavpur University for their continuous inspiration and valuable suggestions at
every step of my journey.

I would take this opportunity to offer my special thanks to our Ex-Director
Prof. Siddhartha Roy and our present Director Prof. Samit Chattopadhyay, CSIR-
Indian Institute of Chemical Biology (IICB), for providing me all the facilities during
this course of work. I also thank Dr. Chitra Mandal the working Director in the
interim period.

Special thanks are due to my lab mates Prasanta and Sandipan for their
constant help, cooperation and inspiration. Swarupadi and Shamik also gave valuable
suggestions at every step of my work. Special thanks go to Shampa Di (Dr. Shampa
Sarkar) for supporting and helping me during some experiments. The assistance
provided by Samshul Haque throughout this Ph. D. period will be fondly remembered
forever.

My special thanks to Prof. Dhrubajyoti Chattopadhyay, Ex-Pro-VC
(Academic), University of Calcutta and Dr. Gopal Chakraborti, Head, Department of
Biotechnology, University of Calcutta for allowing me to get registered in this
department and for taking time out of their busy schedule for serving on my
committee.

I also gratefully acknowledge the financial support provided by the
Department of Science and Technology (DST), New Delhi, India; Labonya Prova
Bose Trust (LPBT), Kolkata, India and Council of Scientific and Industrial Research
(CSIR), New Delhi, India.

I thank Anushila and Anjan for helping me with FACS analysis, Diptodeep
for Confocal microscopy studies, T. Muruganandan for AFM studies, Sandip
Chakraborty for MALDI analysis, M. Vigneshwaran and K. Suresh Kumar for their
instrumental assistance.

I would also like to extend my grateful thanks to all the Scientists of my
Institute for allowing me to use their laboratory facilities and for their valuable
suggestions and support provided at different occasions. The help and facilities
provided by the staffs of Library, Animal House, Computer Section, Store Section,
Dispatch Section, Accounts Section, and Administrative Section are acknowledged sincerely.

I would like to thank all the fellow friends of IICB. Special thanks goes to Chaitali, Chandrima, Nandana, Somsubhra, Somnath (lombu), Sayani, Sukanta, Debanjalidi, Somsuta, Indrani, Pavan, Debrup, Sanghamitra, Sharmistha, Abhi and Deblina.

Bubun, Sudipta, Mukulika, Vivek Da, Rai, Ronita, Sourav, Debarshi are the names which demand special mention. I warmly extend my thanks to all my school and college friends. Acknowledging all by name will really make a very large list.

My achievement would have been impossible without the love and incredible support of my husband, Sudipta Saha, who always believes that I can achieve anything if I put my heart to it. His continuous support in preparing manuscript and designing experiments helped me achieve my goal. I am greatly indebted to my parents and my elder brother for always being my strength and believing in me. I would also like to thank my in-laws for their continuous cooperation, love and support. I would also take the opportunity to thank all my family and my in-laws family members for their full support in building up my confidence.

ARPITA BHOUMIK
