ACKNOWLEDGEMENT

After spending six memorable years at Bose Institute, finally the day has come to submit my thesis. When I look back at the time passed by, I certainly feel the responsibility to acknowledge the people who made my life smooth-sailing.

First of all my heart-felt gratitude goes to my guide Dr. Pallob Kundu, Bose Institute, without his help and support my thesis would have never seen the light of the day. I did both M.Sc project and research work under his supervision. Being the first scholar I had a long relationship with him since 2008, he always encouraged my independent thinking abilities and never interfered unless I expressly asked for his suggestions. I am really indebted to my sir for his valuable suggestions. He taught me how to inspect a problem in different angles.

I was funded by M.Sc-Ph.D. department, Bose Institute Without these fellowships it would have been impossible for me to carry out this research work.

Senior scientists at the Division of Plant Biology, Prof. Swati Gupta Bhattacharya, Prof. A. N. Lahiri Majumder, Prof. Dibyendu N. Sengupta, Prof. Sampa Das, Prof. Amita Pal, Prof. Samir Ranjan Sikdar, Dr. Debabrata Basu, Dr. Gaurab Gangopadhyay, were always helpful and caring throughout my days at Bose Institute. I am thankful to Dr. Shubho Chaudhuri especially who extended his help whenever approached.

Prof. Sunil Kumar Mukherjee were kind enough to supply Tomato Leaf Curl New Delhi virus (ToLCNDV) whenever he was approached.

I am thankful to all the staffs of the Division of Plant Biology, Bose Institute for their help in each and every non-academic need of mine. I will specially like to thank Asim Nath and Binoy Modak for their technical support during my Ph.D. tenure.

Being the first scholar of my sir I have no lab seniors, I would like to acknowledge my junior colleagues Deepti, Jayanti, Payel, Sayani, Rohit, Shreya, Shrabanii and Neelmesh for their constant help and support.

I am also thankful to neighbour laboratory fellow members Dipan, Amit da, Adrita and obviously Payel for their help and supporting me in my work.

My friends at Bose Institute have enriched my life with memories that I will bear in my heart for the rest of my life. I will miss the canteen of Bose Institute and the great Jajiri’s tea shop in front of the Bose Institute. I feel like I should mention the names of each and every one I came across, but am afraid at the same time that I might forget some of them. I hope none of them would mind
this, as I have engraved their names on the wall of my heart. I have many sweet memories of the days I spent with Amit da, Dipan, Mrinmoy da, Anirban Da and Prithwi.

Finally, I would like to thank my parents for their patience and constant support. I owe greatly to their blessings, sacrifice and appreciation. Their constant help and encouragement motivated me to complete my work. Above all I would like to specially thank Aparajita my friend who had patiently accustomed with all the inconveniences what so ever caused. She provided mental support and encouragement throughout and especially during hard times inspired me to regain back my mental courage.

At last, I thank God for giving me all the blessings and the strength to complete my research work successfully.
