Acknowledgement

First and foremost I express my deepest gratitude to both of my research guides Prof. Dipa Biswas and Prof. Sriparna Datta (Department of Chemical Technology, University of Calcutta, Kolkata) for giving me an opportunity to undergo my research work under their guidance. Their immense cognizance in the field of Chemical Technology has always ignited my zeal to pursue my research work with strong determination and perseverance.

This research was impossible without the support and guidance of Dr. Sugata Guchhait from Oil and Natural Gas Corporation Limited, Assam. His contribution cannot be imprisoned by mere words but can only reside in the elegant cottage of my memory.

I am thankful to all faculty members and the staff members of Department of Chemical Technology, University of Calcutta, Kolkata, for providing the freedom to use laboratory facilities to execute our ideas.

I profusely thank:
Technical Education Quality Improvement Programme (TEQIP Phase II, CU) for providing me senior research assistantship (SRA) to carry out this research,
Prof. Sukumar Laik, Dr. Vikas Mahto, Mr. Rituraj Singh and all members of Department of Petroleum Engineering, Indian School of Mines, Dhanbad for extending their support to carry out the EOR experiments,
Mr. Tridip Das from Centre of Excellence, University of Calcutta for his assistance in conducting SEM analysis,
Mr. Uttam Ghorui from Jadavpur University for his support in NMR and FT-IR analysis,
Mr. Smriti Ranjan Maji of Bose Institute, Kolkata for extending his support in GC-MS analysis.

This journey of learning in the spirit of joy and togetherness has been fostered by my colleague-friends of whom Santanu, Avisha, Priyabrata, Soma and Sayan deserve special mention. All my seniors and juniors are also fondly remembered.

My parents, my friend Sudip and all my family members who stood beside me, provided moral and emotional support throughout my research.

Neither words nor verbal appreciation of gratitude is enough to describe the contribution of several persons who led to the successful completion of my research work. Although their invaluable support cannot be expressed in black and white, I must ventilate through these columns my appreciation for one of them individually. Names omitted by mistakes or due to lack of space are highly repented.

And last but not the least

ALL MIGHTY GOD FOR EVERYTHING IN MY LIFE

Munna Bhattacharya
