### 1 General Quantum Correlation: An Overview

1.1 Quantum State and System ....................... 1
1.2 Postulates of Genuine Multipartite Quantum Correlation .... 5
1.3 Local Operation and Classical Communication ........... 6
1.4 Entanglement .................................... 6
   1.4.1 Schmidt Decomposition ...................... 7
   1.4.2 Measures of Entanglement: .................. 8
1.5 General Quantum Correlation ..................... 13
   1.5.1 Quantum Discord ............................ 15
   1.5.2 Geometric Discord .......................... 21
   1.5.3 Relative Entropic Discord and Dissonance .... 26
   1.5.4 Quantum Deficit ............................ 27
   1.5.5 Measurement-Induced Disturbance ............. 28
   1.5.6 Measurement-Induced Nonlocality ............. 29
1.6 Applications of General Quantum Correlation .......... 32
1.7 Interpretations .................................. 32
1.8 Experimental Achievements ....................... 36
1.9 Discussions .................................... 36

### 2 Monogamy of Measurement-Induced Nonlocality

2.1 Introduction .................................... 37
2.2 Entanglement Monogamy .......................... 38
2.3 Monogamy of General Quantum Correlation ............ 40
2.4 MIN in Bi-partite System ........................ 41
2.5 Some Special Four-Qubit Class of States .............. 43
2.6 Monogamy of MIN ................................ 44
   2.6.1 Monogamy in Three-Qubit System .............. 45
   2.6.2 Monogamy in Four-Qubit System ............... 46
2.7 Discussions .................................... 49
# Decoherence Dynamics of Non-classical Correlations

## 3.1 Introduction

## 3.2 Markovian and Non-Markovian Dynamics

## 3.3 Dynamics of Quantum Discord

## 3.4 Preliminary Notions on MIN and Geometric Discord

## 3.5 Markovian Dynamics of MIN and Geometric Discord

### 3.5.1 Depolarizing Channel

### 3.5.2 Dephasing Channel

### 3.5.3 Generalized Amplitude Damping Channel

### 3.5.4 Dephasing and Amplitude Damping

## 3.6 Dephasing and Amplitude Damping Noise under Non-Markovian Dynamics

## 3.7 Discussions

# Local Quantum Uncertainty and Bounds on Quantumness for Orthogonally Invariant Class of States

## 4.1 Introduction

## 4.2 Local Quantum Uncertainty

### 4.2.1 Properties

### 4.2.2 Application in Quantum Metrology

### 4.2.3 Local Quantum Uncertainty in DQC1 Model

### 4.2.4 Geometrical Interpretation

## 4.3 Some More Ideas on Discord and MIN

## 4.4 Local Quantum Uncertainty in Orthogonally Invariant Class of States

### 4.4.1 Orthogonal Invariant Class of States

### 4.4.2 Local Quantum Uncertainty for a Fixed Spectrum

## 4.5 Bounds for Discord and MIN for Orthogonally Invariant States

## 4.6 Discord and Negativity in Orthogonally Invariant Class of States

## 4.7 Local Quantum Uncertainty - A General Approach

## 4.8 Discussions

# Local Quantum Uncertainty in Two-Qubit Separable States

## 5.1 Introduction

## 5.2 Quantumness in Separable States

## 5.3 LQU in Separable States

### 5.3.1 LQU in Separable X-states

### 5.3.2 LQU for Separable Bell Diagonal States

### 5.3.3 Comparison with Dissonance

## 5.4 Relation to Entropic Uncertainty

## 5.5 Discussions
