Acknowledgements

I wish to begin by acknowledging all those who have helped me for the completion of my thesis.

I am highly indebted to my first supervisor Prof. Sumita Jha, Department of Botany, University of Calcutta, for her invaluable guidance, sympathetic attitude and emotional support throughout my work. She was very understanding and patient with me and it was her continuous moral support, guidance, cooperation and encouragement that led me to complete the work. I would also wish to express my most sincere gratitude to my other supervisors, Dr. Biswajit Ghosh, Department of Botany, RKMVC College, Rahara and Dr. Sudipta Ray, Department of Botany, University of Calcutta for providing helpful guidance, encouragement and their friendly way of supervision during the course of my work.

I would also like to express my sincere thanks to Dr. Krishnadas Nandagopal and Dr. Mainak Sengupta, Department of Genetics, University of Calcutta for their help, valuable suggestions and flawless guidance during the course of my research work.

I am grateful to the Head, Department of Botany, University of Calcutta and the Head, Department of Genetics, University of Calcutta for the facilities provided.

I deeply acknowledge the advice and help of Prof. Subir Bera, Department of Botany, University of Calcutta and Dr. S.K. Bharati, Palaeontology Division, Geological Survey of India for their guidance for the SEM analysis. Thanks are due to Dr. Sanjaya Mallick and Dr. Debojit Bhowmick for their help in the flow cytometric experiments at CRNN, University of Calcutta.

I am very grateful to the Senior Prof. A. K. Sharma sir and Prof. Sumitra Sen ma'am for their valuable suggestions and support during my research work.

I would like to thank the University Grants Commission for the award of RFSMS Fellowship.
I owe my deepest gratitude to my family members who have always prayed for me. My heartfelt thanks are due to my uncle, my mom, my brother, my sister and my brother-in-law for their moral support, understanding, and encouragement during my studies. They gave me a reason to plough on in spite of many difficult times and challenges.

It is also my pleasure to acknowledge the debt I owe to all my laboratory members: Anrini di, Sukanya di, Than di, Smita di, Dipasree di, Amrita di, Bipradut da, Mihir, Pijush, Tapojita, Biplab, Sayantani, Sayantika, Rahul and Ipshita for their assistance, encouragement and friendly advices.

I would like to thank my Joint-Supervisor, Dr. Biswajit Ghosh’s research group: Tuhin da, Moka da, Suvo, Anupam and my friends: Naresh, Kamal, Nitin, Sujoy and Anusree for their support during the work.

I am also grateful to the following persons whose assistance at certain intervals enabled me to smoothly carry out my work: Prof. T. B. Jha of Department of Botany, Barasat Government College, West Bengal State University who helped me to collect the sample plants. Dr. Shyam Biswa and Mr. K. L. Maity of CNH, Botanical Survey of India, Howrah- 711103 who helped me with the taxonomic identification of the plant materials used in this study. I cannot forget Mr. Prasanta Sengupta who gave me many books during my study period. I also do thank Duryodhan da, Kanai da and Mahadev da for their assistance in handling the plant materials in the experimental garden.

I cannot name everyone but my thanks go out to everyone who in one way or another made it possible for me to successfully complete my work.

Partha Sarathi Saha
