ACKNOWLEDGEMENTS

I express my deepest gratitude to my academic supervisor, Professor Bijan Kumar Bagchi, Department of Applied Mathematics, University of Calcutta, 92, A.P.C. Road, Kolkata-700009 and to my co-supervisor, Professor Kamal Kanti Nandi, Department of Mathematics, University of North Bengal, Darjeeling- 734013. Without their constant encouragement and valuable guidance, this work would not have been possible.

I am, especially, grateful to Professor Arunava Bhadra of the High Energy Cosmic Ray Research Centre, University of North Bengal, Darjeeling-734013 and to my groups of overseas collaborators from Italy and Russia. I am sincerely thankful to Professors, Carlo Cattani, Ettore Laserra and Massimo Scalia for their collaboration and hospitality during my visit to the University of Salerno and University of Rome, Italy respectively.

I am thankful to the CSIR for the fellowship of JRF, which made part of the work possible. I am grateful to the faculty members of the Department of Applied Mathematics, University of Calcutta and of the Department of Mathematics, University of North Bengal for their kindness and readiness to help me as and when it was necessary.

I tender my sincere thanks to the authors, whose works I have used in my thesis and to many anonymous referees for their criticisms (not always kind!) and insightful remarks that, at the end, considerably improved the quality of work presented here.

I wish to acknowledge indebtedness to my parents (Basabi and Amal Bhattacharya) for their sacrifices, to my uncles (Tushar Kanti Nandi, Shyamal Kanti Nandi) and aunt (Kaberi Nag) for their love and care. I express my love to my younger brother Abhirup, cousin brothers Anirban, Kallol and cousin sisters, Anindita, Anamika and to all the other remaining members of my extended family, for their understanding and support.

My sincere love, gratitude and hearty hug to my friend Sonali Sarkar for her ever smiling understanding and generous help with all administrative and technical matters. Without her efficient help, this thesis could not be prepared in a presentable form.

I wish I could ever fully express my special love and respect for my beloved husband, who is a scientist himself at a well known Research Centre. It is actually he who needed my domestic
support for my taxing job but he endured this lack and extended all conceivable support
during my research work. He has always been the greatest source of inspiration to me.

And last but not least, I tender my sincere love and respect, whichever appropriate, to all
those friends and relatives, whom I could not specifically name here due to lack of space.

Kolkata

May 2016
