Table of contents

Introduction .................................................. 1

Background

Chapter I – Preliminary ideas of fuzzy set theory and financial derivatives 6
Chapter II - Stochastic processes and extreme value distributions-an overview 25
Chapter III – Basics of a stochastic differential equation and examples of key SDE models in pricing derivatives 36

Main work

Chapter IV – Applications of fuzzy set theory to estimate certain parameters of the new models 55
Chapter V – The stochastic differential equation models I and II 63
Chapter VI - Applications of the proposed models to pricing of commodity futures 85
Chapter VII- Fuzzy stochastic models 114

Conclusion and future direction of work 134

Appendix A ...................................................... 140
Appendix B ...................................................... 145

List of Tables

Table 1.1 - Strike price interval and number of strikes offered at NSE.
Table 4.1 - The importance of the nodes in the FCM.
Table 6.1 - The estimated parameters for all data sets used for testing.
Table 7.1 - Comparison of observed rainfall and estimated values from model
I. Table C.1 - Expected percentage change in the asset price at a future date as
determined from our models.
Table C.2 - Expected asset price at a future date as determined from our models. Table
C.3 - Expected asset price at a future date as determined by our fuzzy models
and the actual values.
Table A.1 - The stabilized output vectors for the FCM.
Table A.2 - The modified adjacency matrix for the FCM.
Table A.3 - The simulated output for the FCM.
Table A.4 – The nature of the change among the factors.
Table B.1 – A sample of the data available at www.mcx.
List of Figures

Fig 1.1  A trapezoidal fuzzy number.

Fig 2.1  Discrete form of a random walk.

Fig 2.2  A sample path of a Brownian motion.

Fig 2.3  The Pareto charts for different location parameters.

Fig 4.1  The Fuzzy Cognitive Map.

Fig 6.1a  P-P plot with GPD for the positive part of data set (A).

Fig 6.1b  P-P plot with GPD for the negative part of data set (A).

Fig 6.1c  P-P plot with GPD for the positive part of data set (B).

Fig 6.1d  P-P plot with GPD for the negative part of data set (B).

Fig 6.1e  P-P plot with normal distribution for the positive part of data set (B).

Fig 6.1f  P-P plot with normal distribution for the negative part of data set (B).

Fig 6.1g  P-P plot with GPD for the positive part of data set (C).

Fig 6.1h  P-P plot with GPD for the negative part of data set (C).

Fig 6.1i  Comparison of actual values and model I values for gold futures contracts at MCX in the beginning of year 2013.

Fig 6.1j  Comparison of actual values and model I values for gold futures contracts at MCX in the beginning of year 2012.

Fig 6.1k  Comparison of actual values and model I values for futures contracts on INR-US $ exchange rate at MCX in the beginning of year 2013.

Fig 6.2a  Comparison of actual values and model I values for cotton futures contracts at MCX in the beginning of year 2012.
Fig 6.3a  Comparison of actual values and model II values for gold futures contracts at MCX in the beginning of year 2013.

Fig 6.3b  Comparison of actual values and model II values for gold futures contracts at MCX in the beginning of year 2012.

Fig 6.3c  Comparison of actual values and model II values for gold futures contracts at MCX in the beginning of year 2013 with addition of a scale factor.

Fig 8.1a, 8.1c Comparison of daily traded values of “low” and fuzzy model values for gold futures contracts at MCX in the beginning of year 2013.

Fig 8.1b, 8.1d Comparison of daily traded values of “high” and fuzzy model values for gold futures contracts at MCX in the beginning of year 2013.

Fig 8.2  Comparison of actual and model I values of daily ISMR values in July 2013.

Fig A.1  Comparison of actual values with both model I and model II values for gold futures contracts at MCX in the beginning of year 2013.

Fig A.2  Comparison of fuzzy model values with model II values for gold futures contracts at MCX in the beginning of year 2013.

Fig B.1 Comparison of actual values of gold futures contracts in the beginning of 2013 with both model I and model II values.

Fig B.2  Comparison of actual values of gold futures contracts in the beginning of 2013 with our fuzzy model values.
