ACKNOWLEDGMENTS

A major research work like this is never the work of anyone alone. The contributions of many different people, in their different ways, have made this possible. I would like to extend my appreciation especially to the following.

My deepest gratitude is to my advisor, I have been amazingly fortunate to have an advisor who gave me the freedom to explore on my own and at the same time the steer to recover when my steps faltered. His patience and support helped me overcome many crisis situations and finish this dissertation. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph. D study.

I am greatly thankful to Prof. S. A. Chimatdar, Chairman and Prof. S. A. Patil and Prof. S. T. Friends fill a special part in your life. Their support and care helped me to stay sane and overcome my setbacks and stay focused on my research work. I greatly value friendship of Trupti, Veena Saraswati and Jaya. I deeply appreciate their belief in me.

I deeply appreciate the friendship and support that I have received from my lab mates, Dr. Sathisha, Dr. Naveen, Dr. Gurunath, Dr. Srinivas, Ganesh Hegde, Sandeep, Dhoolesh, Avinash and Vinayak Kamat. Thank you very much for being with me throughout the joys and sorrows of my research life.

I thank all my friends and co-research scholars for making my life at KUD enjoyable and memorable.

Most importantly, none of this would have been possible without the love and patience of my family to whom this thesis is dedicated to, who have been a constant source of love, concern, support and strength all these years. I would like to express my heart-felt gratitude to my family.

Above all my special thanks to Almighty, whose invisible hands have sustained me through all the tough modes of my Life.
