ACKNOWLEDGEMENTS

It is my honour to express my deep sense of gratitude to a number of people who helped me conduct this study to fulfill my Ph.D. (Sc) degree.

First of all, I am indebted to my supervisor, Dr. Mitali Chatterjee, for giving me the opportunity to pursue my doctoral work in her lab. I am thankful for her critical guidance, her eye for detail, immense knowledge and logical way of constructing research hypothesis, which collectively were of great value to me.

I thank the Director, Institute of Post Graduate Medical Education and Research, and the past and present Departmental heads (Pharmacology), Prof. Susanta Bandyopadhyay and Prof. Dipankar Bhattacharya, for providing me with access to various institutional facilities. I am also thankful to the departmental faculties especially to Dr. Suparna Chatterjee and Dr. Avijit Hazra for sharing their sound knowledge, encouragement and support.

I remain grateful to Dr. Anindita Chakroborty (Inter University Consortium, Kolkata) and Dr. Madhumita Manna (Bethune College, Kolkata) for having encouraged me to join Dr. Chatterjee's group in the first place.

It has been my privilege to have worked and shared laboratory- and mind-space with all of my colleagues. My deepest thanks to - Avijit Da, Gautam Da, Samiran Da, Nilay Da, Anup Da, Debjani, Piu, Harsharan Sir, Nazmun, Soumi, Avijit, Sunanda, Alak, Debanjan, Susmita (Roy and Ghosh), Debasree, Asils, Dibyendu and all the trainee students for their cooperation and giving me a peaceful and friendly research environment all through my Ph.D. life in their own way. A special thanks to Deepak for his valuable co-operation. I can never be thankful enough for the never-ending support from each and everyone. In the same stratum, I would like to express my genuine regard and appreciation to the past and present MD students of the department including Ananya (Sr.), Phalguni di, Souvik, Tanmoy Da, Ananya (Jr.), Anupam, Gairik, Musfleur and Supriyo for discussing aspects of pharmacology for my experiments and also for their support in making our department a lively space for work.

I am especially grateful to Dr. Subrata Chattopadhyay (BARC, Mumbai) and Prof. Richard K. Haynes (Hong Kong University of Science and Technology, Kowloon, China) for providing valuable fractions which were the basis of my research work.

I also express my gratitude to Prof. Basudeb Bhattacharya, my PhD co-supervisor for his able guidance and advice. I also wish to express my warm and sincere thanks to Prof. Saswata Chakrabarti and Dr. Sandip Banerjee, Dept. of Biochemistry, IPGMER, for their kind support. I would also like to thank my fellow researchers in the department of Biochemistry including Prasun and Anindya for their co-operation.
I am also thankful to Prof. Partha Saha and the members of his group (Sanjib Da, Sushanto Da, Dipankar, Kasturi and Anup) at the Crystallography and Molecular Biology Division, Saha Institute of Nuclear Physics, Kolkata, Ayan from Gastroenterology (IPGMER, Kolkata), Dr. Chitra Mandal and Dr. Padma Das, Indian Institute of Chemical Biology, Kolkata for their sincere cooperation and access to several of their facilities.

I will always remain thankful to the late Ramphal Malik, our resident animal technician, for teaching me various animal handling skills which were of considerable use during my animal experiments. I also thank Lala Ram and Mukesh Balmiki, security persons, for their general assistance.

A heartfelt thank you to my trusted and longtime friends, Sanhita, Shyam, Deepanj, Sonali, Sutapa and Mithun for their constant encouragement, love and support through thick and thin. My warmest thanks to Sudipto for his incessant encouragement, love and support for summing up my thesis work to the best of my ability.

Most importantly, I would never have come this far without my mother Mrs. Reba Sen who remained my strongest supporter, critic and a friend all my life. Her selfless concern throughout my days of struggle has given me constant inspiration for the battle of life. I also stay indebted to my sisters, Mrs. Mohua Palit and Dr. Tanusree Sen for their constant encouragement, valuable inputs, love and support as also from my brothers-in-law, Mr. Bhaskar Palit and Dr. Nilkantha Sen. It is a pleasure to acknowledge my adorable nephew Abhishek Palit and bubbly niece TanniSha Sen for their presence in my life.

I sincerely acknowledge the financial support from Indian Council of Medical Research (ICMR), University Grants Commission (UGC), Department of Science and Technology (DST), Centre for Co-operation in Science & Technology among Developing Societies (CCSTDS) Government of India and the Labonya Prabha Trust which enabled me to finish my work.

I express my gratitude to the patients who suffer from Leishmaniasis and hope that someday new medications may help wipe the disease from our world. Last but not the least, I thank all the people who, knowingly or unknowingly, helped me to complete my Ph.D. thesis.

Rupashree Sen
