Acknowledgement

I would like to take this opportunity to convey my heartfelt thanks to my supervisor Prof. Animesh Maitra, whose guidance, encouragement and support has helped me to traverse a long path and finally arrive at my destination. From the very beginning to the end of my project, his able guidance has enabled me to develop a thorough understanding of the subject. He has shown me the way and encouraged me to explore the subject on my own. Working under him will always be a treasure to cherish.

I thankfully acknowledge the financial support provided by Indian Space Research Organization (ISRO) in terms of project assistantship and research fellowship during the course of my research work for completion of Ph.D thesis.

My special thanks goes to Prof. Ashish Das Gupta, Prof. Debotosh Guha, Dr. Abhirup Das Burman and Dr. Soma Burman, of Institute of Radio Physics and Electronics, University of Calcutta for their continuous encouragement, which they extended to me during the course of this work.

I also want to express my gratitude to Prof. B.N. Goswami, Dr. P. Mukhopadhyay and Dr. P.E. Raj of Indian Institute of Tropical Meteorology, Pune, for their constant support during the ending phase of my research work.

I would also like to thank Dr. Ashik Pal, Dr. Sarbani Ray and Ms Aditi Das, of S.K. Mitra Centre for Research in Space Environment, University of Calcutta, for all their help and support during my project. They have always extended their helping hand to me in every possible way, by providing valuable suggestions and important references.

I am thankful to my wonderful Colleagues & my Lab mates, Swastikadi, Sheershendu, Srijibendu, Saurabh, Arpita and Aniruddha- working with whom has always been enjoyable. A special thanks also goes to Mr. Bimal Biswas and Mr. Haripada Makhal for their co-operation during the course of my work.

This page cannot be completed if I do not mention the name of Ms Chandrani Shome and Mr. Debrup Hui. Chandrani always stood by my side with her wide range of vocabulary sets by shaping my powerpoint presentations to the editing of my thesis. Debrup, a fellow researcher and friend, has also made available his support in number of ways. There are not enough words to express my thanks to Chandrani & Debrup, who were always there with me starting from the initial stage of my research life.

Lastly, I would like to dedicate my work to my parents, without whom I would have never achieved anything at all. Through every ebb and tide they have been my support, my strength. It is their blessings and love that has brought me to this day that I can write an acknowledgement to my work. I pay my humble regards to them and seek their blessings.

I end by expressing my regards and best wishes to all of those who supported me in any respect during the completion of my thesis.

Kaustav Chakravarty
