Acknowledgements

My sincerest gratitude goes to my guide Dr. Dinesh Gupta for his confidence in me all these years and in helping me work freely. His patience and insight into the subject have always made me realize and understand the subject in a broader perspective. Working in his lab was like visiting a friend’s room. His untiring efforts, parental care, benign help and soothing concern have made it possible to bring out this thesis.

I would like to express my gratitude to Prof. V. S. Chauhan, Director, ICGEB, for his constant help, encouragement, constructive criticism and ingenious inspiration. I shall never cease to admire his invaluable suggestions and special interest in this project. I am grateful to his attitude, which gives space for naïve people like me to be creative.

I am highly indebted to Dr. Asif Mohmmed, who treated me more like his brother rather than a junior and helped me in every aspect of my thesis. I am thankful to him for his patience and relentless support. His contributions in making me understand minute technical details of parasite culture remain unmatched.

My utmost regards to Dr. Pawan Malhotra for his intellectual support and motivation during the research work.

My thanks are due to Dr. Dinkar Sahal, Dr. Chetan Chitnis, Dr. Sunil Mukherjee, Dr. Sudir Sapori for their critical suggestions, which helped me in improving the quality of the work and for seeding interest in me regarding biology by their excellent teaching capabilities.

I am thankful to Dr. Amit Sharma, Dr. Renu Tuteja, and Dr. Paushali Mukherjee for their support.

I profusely thank my friends Mridul, Sangeetha, Ansuman, Aarthi, Umesh and Reetesh in Bioinformatics lab for their company and support.
Seniors like Das, Kannan, Amit, Bhavna, Himani and B. N. Singh made learning so much easier. Their unconditional support and help have made working a pleasure.

I would like to extend my thanks to fellow lab mates especially Maryam, Sujatha, Tatiana, Arun, Chanu, Reetesh, Ravi, Suchi, Neha, Reshma, Manzar, Suraksha and to all the members of malaria group for helping me at various stages of my work and for bearing my nonsense with lots of patience. I would like to thank all my juniors for their company and help.

I am thankful to Sangram and Narender for the help rendered by them.

I would also like to thank UGC and CSIR for providing financial support for pursuing my thesis.

My special thanks to all my loving friends and family members for their love, affection and encouragement without which I am nowhere.
