...to my parents
ACKNOWLEDGEMENT

In the first place I would like to record my heartfelt gratitude to my supervisor Dr Rakesh Kumar for his enthusiastic supervision, advice and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the work. With his dedication, his inspiration, and his great efforts to explain things clearly and simply, he helped to make mathematics fun for me. Throughout my thesis-writing period, he provided encouragement, sound advice, good teaching, good company, and lots of good ideas. I could not have imagined having a better advisor and mentor for my Ph.D study.

I especially want to thank my co-supervisor, Dr R.K. Nagaich, for his guidance during my research. He provided me unflinching encouragement and support in various ways.

I am greatly indebted to my parents and my younger brother for their unconditional support, both financially and emotionally throughout my degree. In particular, the patience and understanding shown by my mother is greatly appreciated. I know, at times, my temper is particularly trying. So I want to thank my mother for being a consistent source of inspiration and supporting me spiritually throughout my life.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Above all, I want to Thank God for the wisdom and perseverance that he has bestowed upon me during the Ph.D study, and indeed, throughout my life.

Sangeet Kumar
