Dr. Shivaji, well, he has been more than just a supervisor to me these few years! One would be considered lucky to be associated to such nice people and I am one of such few. His commitment towards everything he does and sincerity in work will always remain a source of inspiration for me. I will remember the good times I had with his family for a long time. I express (the inexpressible) my gratitude to him; for all that he did to me.

I thank Dr. Lalji Singh for the support, and the kind of facilities he provided, making CCMB such a wonderful place to work.

Prakash has been a very helpful guy and was always there when there was a cloud. I thank him for all the help that he rendered during my stay in CCMB.

Sundar is one of the few I saw, who knows to live life the way it is supposed to be lived. His presence is bliss time, any time. My stay was made very comfortable in the lab, thanks to his sense of humor. He is a true technical brain and is almost always ready with a useful suggestion.

Kasturi was always there with me, through the odds and evens of my journey in CCMB. Malay, a difficult guy for most of the people to understand, is actually a great guy to be with. The time I and Roshni spent with Kasturi and Malay are most memorable to us. I thank Kasturi, also for proof reading my thesis.

Ashish is a very sweet guy for any one to talk to. He is a guy who was all willing to help me, any time, any day. He is one of my sweet memories of CCMB.

My brothers, Pavan and Krishna, are probably my assets. The kind of help they are willing to put in is beyond verbal expression. I feel very lucky to be their sibling.
Roshni is now a part of my life and I am really happy that such a caring person is with me for the rest of my life. It is no exaggeration to say that I owe my MBA and a great part of my Ph D to her. If there are emotional expressions that can not be put in words, I probably have it for her. My last few months in CCMB are also filled with the sweet smiles of my son, Aki.

My parents, well, I remember the hard time they had to bring us up to this stage. These statements are too small for me to express my feeling for them. Needless to say, I am here because of them.

I thank all the technical staff of the instrumentation for the kind of support they provided. Most of the work done would not have been possible, if they were not so efficient.

I thank my friends in CCMB for the way they are. I had fun time here because of them. Six years would have been apparently longer without them.

I acknowledge the timely help and superb laboratory assistance provided by Devender and Venugopal.

I remember all the members of west wing ground floor.

Financial support by UGC and CSIR is acknowledged.
