

ACKNOWLEDGEMENTS

It is an honour to acknowledge my debt of gratitude to my research supervisor, Dr. E.A. Mashelkar, Dy. Director, N.C.L., and Head of Chemical Engineering Division, for his inspiring guidance and encouragement in the course of this work.

I am deeply indebted to Dr. M.G. Kulkarni, Scientist, Chemical Engineering Division, for his generous help. The frequent discussions I had with him were invaluable.

My grateful thanks are due to Dr. L.K. Doraiswamy, Director, N.C.L., for permitting me to use the facilities of N.C.L. and to submit this thesis to the University of Poona for the degree of Doctor of Philosophy. I also thank the CSIR for providing financial support for this work.

I am grateful to Mr. T. Koshy for the neat and quick typing of this thesis, Miss S. Mayadevi for her help with the corrections, and to all my friends and colleagues who have helped me in various ways.

Renuka Sood
