## Contents

1 Introduction 1
   1.1 Introduction ......................................................... 1
   1.2 Outline of the Thesis ............................................. 3

2 Evolution Equations in Presence of a Thin Thermocline 8
   2.1 Fourth Order Nonlinear Evolution Equations for Capillary-gravity Waves in the Presence of a Thin Thermocline in Deep Water .................. 9
      2.1.1 Introduction ..................................................... 9
      2.1.2 Basic Equations ............................................... 10
      2.1.3 Derivation of Evolution Equations ....................... 12
      2.1.4 Stability Analysis ............................................ 20
      2.1.5 Conclusion ..................................................... 26

   2.2 Fourth Order Nonlinear Evolution Equation for Capillary-gravity Waves in Deep Water in the Presence of a Thin Thermocline Including the Effect of Wind ........................................ 28
      2.2.1 Introduction ..................................................... 28
      2.2.2 Basic Equations ............................................... 28
      2.2.3 Derivation of Evolution Equation ....................... 33
      2.2.4 Stability Analysis ............................................ 39
      2.2.5 Conclusion ..................................................... 44
3 Evolution Equations for Broad Bandwidth Gravity Wave Packets 45

3.1 A Higher Order Nonlinear Evolution Equation for Broader Bandwidth Gravity Waves in Deep Water 46
   3.1.1 Introduction 46
   3.1.2 Derivation of the Higher Order Evolution Equation 46
   3.1.3 Stability of a Uniform Stokes Wave 52
   3.1.4 Conclusion 55

3.2 A Higher Order Nonlinear Evolution Equation for Much broader Bandwidth Gravity Waves in Deep Water 56
   3.2.1 Introduction 56
   3.2.2 Derivation of Higher Order Evolution Equation 56
   3.2.3 Stability of a Uniform Stokes Wave Train 59
   3.2.4 Conclusion 62

4 Evolution Equations for One Wave Packet in Presence of Another Wave Packet 63

4.1 Fourth Order Nonlinear Evolution Equations for Counter-propagating Capillary-gravity Wave Packets on the Surface of Water of Infinite Depth 64
   4.1.1 Introduction 64
   4.1.2 Basic Equations 64
   4.1.3 Derivation of Evolution Equations 65
   4.1.4 Stability Analysis 77
   4.1.5 Conclusion 81

4.2 Fourth Order Nonlinear Evolution Equations for a Capillary-gravity Wave Packet in the Presence of Another Wave Packet in Deep Water 83
   4.2.1 Introduction 83
   4.2.2 Derivation of Evolution Equations 84
