Acknowledgements

1 Introduction 1
   1.1 Preliminary Discussions 1
   1.2 Scope of the Thesis 2
   1.3 Outline of the Thesis 4

2 Quantum Interference in Atoms and Molecules: A Review 7
   2.1 Fano Interference 9
   2.2 Spontaneous Emission and Vacuum-Induced Coherence 12
   2.3 Quantum Beats 15

3 Fano-Feshbach Resonances 20
   3.1 Ultracold Scattering and Resonances 20
      3.1.1 Elastic Scattering 20
      3.1.2 Scattering Length in Ultracold Gases 22
      3.1.3 Scattering Resonances at Low Energy 22
   3.2 Single Channel Resonance 24
      3.2.1 Shape Resonance 24
      3.2.2 Potential Resonance 24
   3.3 Feshbach Resonance: A Multichannel Resonance 25
      3.3.1 Magnetic Feshbach Resonance 26
      3.3.2 Scattering Length and Feshbach Resonance 27
   3.4 Photoassociation and Optical Feshbach Resonance 28

4 Quantum Interference in Photoassociation in the Presence of Feshbach Resonance 35
   4.1 Perspective of The Work 35
   4.2 Formulation of the Problem and Solution 36
   4.3 Results and Discussions 43
      4.3.1 Analytical Results 43
      4.3.2 Numerical Results and Discussion 47
   4.4 Conclusions 48
## Contents

5 Vacuum- and Light-Induced Coherences in Cold Atoms and Molecules 51

5.1 Perspective of The work ................................. 52

5.2 Scheme 1 ................................................ 53

5.3 Solution .................................................. 56

5.4 Results and Discussions ............................... 59

5.5 Scheme 2 ................................................ 62

5.6 Master equation ......................................... 69

5.7 Solution .................................................. 72

5.8 Results and discussions ............................... 74

5.9 Conclusion ............................................... 83

6 Atom-Ion Cold Collisions: Formation of Cold Molecular Ion 88

6.1 Theory of Atom-Ion Collision ......................... 89

6.1.1 Atom-Ion Interaction Potential ................... 91

6.1.2 Elastic Collisions .................................... 92

6.1.3 Radiative Transfer .................................. 94

6.1.4 Spin Exchange Collision ............................ 96

6.2 Fomation of Cold Molecular Ion .................... 98

6.2.1 Formulation of Problem ............................ 99

6.3 Results and Discussion ............................... 103

6.4 Conclusions .............................................. 109

7 Conclusions and Outlook ............................... 115

List of Publications ....................................... 119
