ACKNOWLEDGEMENT

I am deeply indebted to my supervisor, Dr. N. Rajeshwara Rao, Associate Professor, Department of Applied Geology, University of Madras, for his supervision, advice, and guidance that began from the very early stage of this research and for giving me extraordinary experiences throughout the work. I offer my profound gratitude to him, who provided me unflinching encouragement, stimulating suggestions and support in various ways and helped me in all aspects of research.

I extend my heartfelt thanks to Dr. R. R. Krishnamurthy, Head, Department of Applied Geology, University of Madras, for his timely and valuable suggestions, support and encouragement of this study.

It is with immense gratitude that I acknowledge the support and help of my former Professor and Heads, Dr. P. Periakali and Dr. K. K. Sharma, Department of Applied Geology, for their valuable advice and extensive discussions regarding my work.

I express my deep sense of appreciation to Dr. P. N. Ballukraya, Professor (Retd.), Department of Applied Geology, University of Madras, for his constant encouragement during the course of this study.

I would also like to express my sincere gratitude to the Doctoral Committee member, Dr. S. Srinivasalu, Professor and Director, Institute of Ocean Management (IOM), Anna University, Guindy, Chennai, for his sound scientific advice and knowledge and many insightful discussions and suggestions.

I express my sincere thanks to Dr. S. G. D. Sridhar and Dr. M. Jayaprakash, Associate Professors, Department of Applied Geology, University of Madras, for their constant encouragement during the course of this study.

Very special thanks go to Dr. G. A. Ramadass, Project Director, Scientist-F, and Dr. S. Ramesh, Scientist-E, of the Submersibles Division, NIOT; they provided core samples. Dissolved oxygen (DO in mL.L⁻¹) and temperature (in °C) raw data were also provided by the NIOT.

I am extremely thankful to my seniors, especially Drs. M. Sheeba, P. Adarsh, K. Paramasivam, and G. VijayaKumar for their support and help rendered throughout my study.
I would like to thank from bottom of my heart to my brothers Messrs. S. Anbalagan and R. Pasupathi for their help during the course of my research work. In addition, I would like to thank Messrs. Sathiyaseelan, Chinnadurai and Uvaraj.

It gives me immense pleasure in thanking my colleagues Mr. R. Kalaivanan, Dr. S. Muthusamy, Dr. G. Kanagaraj, Dr. Basker, Dr. Arya Viswam, Dr. Bhuvana, Mr. S. Nethaji, Dr. V. Gopal, Saubhagya Ranjan Mahapatra, A. Shanmugasundharam, S. Maniyarasan, Sangunathan, Ramachandran, B. Nithya, Balasubramaniyan, and Sakthivel, to a great extent for their constant source of inspiration, kindness and support to me.

Very special thanks go to my dear friends Ms. T. Sorna Kamatchi, Ramamurthy, Baskar, Jaya, Uma, Sarala, Prabakar for being great and reliable with whom I could always talk about my problems and excitement. I always ended up with confidence and full of energy after the discussions with them.

I would also like to thank Mr. Shanmugam Research scholar, Department of Nano Science, Anna University, and Mr. Muralitharan, Research Scholar, Department of Geology, University of Madras, for their help with regard to SEM photographs. Then, thanks go to my brother Mr. Jegan for his help to arranging SEM images.

I express my deep sense of appreciation to Mr. G. Kaviarasu (Tech Gr. II), Mr. Lakshmi Narayan (Assistant ASO), Mr. S. Venugopal (Lab Assistant), and Mr. M. Manohar (Off. Assistant), Department of Applied Geology, University of Madras, for their support and help rendered throughout my study.

I would like to thank from bottom of my heart to my father, Mr. Ashok Kumar; he always lovingly and selflessly cared for my parents and family.

Most importantly, none of this would have been possible without the love and patience of my family. My immediate family, to whom this thesis is dedicated to, has been a constant source of love, concern, support and strength all these years. I would like to express my heart-felt gratitude to my family. My extended family has aided and encouraged me throughout this endeavor.

I have to give a special mention for the memory of my father, A. Pachaiyappan, who has been my role-model for hard work, persistence and personal sacrifices, and who
instilled in me the inspiration to set high goals and the confidence to achieve them. My mother, P. Chandrakantha emphasized the importance of education and helped me with my lessons throughout her life. My sister, B. Meenakshi and my brother–in–law, C. Bakkiyaraj and son B. Devendran were reliable persons with whom I could always talk about my problems and excitement. I always ended up with confidence and full of energy after the discussions with them. My elder brother, P. Arul, and my sister–in–law, A. Malathi, and her daughters A. Rakshitha and A. Riya, my younger brother, P. Veerakkumaran, are hereby wholeheartedly thanked for their financial support and encouragement throughout my life. Without their support, it would have been impossible for me to finish my college and graduate education.

Very special thanks go to my younger brother, G. Ragavan, for being a great and reliable person, with whom I could always talk about my problems and excitement. I always ended up with confidence and full of energy after the discussions with him.

I am grateful to the authorities of University of Madras for permitting me to do this research and for providing necessary laboratory facilities in the Department of Applied Geology, University of Madras.

Above all, I owe it all to Almighty God for granting me the wisdom, health and strength to undertake this research task and enabling me to its completion.

P. Kamatchi
