

Contents

1	Introduction	6
1.1	Reaction-diffusion (RD) processes and Turing instability	8
1.2	Networks	11
1.2.1	Network Measures	13
1.2.2	Random Networks	14
1.2.3	Scale-free networks	15
1.3	Gene Expression	16
1.3.1	Regulation of Gene Expression	16
1.3.2	Gene Transcription Regulatory Networks	20
1.3.3	Stochasticity and Noise in gene expression	21
1.4	Plan of Thesis	27
2	Reaction diffusion processes on networks	32
2.1	Introduction	32
2.2	Turing patterns in RD networks	34
2.3	Summary and Discussion	41
3	Dynamics of a double positive feedback loop coupled with autorepression	47
3.1	Introduction	47
3.2	Deterministic Approach	50
3.3	Stochastic Approach	59
3.4	Summary and Discussion	64
4	Transient Gene Expression Activity in Jasmonate Signaling Pathway	70
4.1	Introduction	70
4.2	Mathematical model of JA-Signaling Pathway	73
4.3	Stochastic Dynamics	83

4.4 Summary and Discussion	88
5 Summary and concluding remarks	96
