PREFACE	i
ACKNOWLEDGEMENT	v
LIST OF FIGURES	xiii
LIST OF TABLES	xiv

PART - I

GENERAL INTRODUCTION	1
HEMICELLULOSES	6
CAMBIUM	9
BAEL TREE AND A SHORT REVIEW OF EARLY INVESTIGATIONS	10
METHODS	14
THEORETICAL ASPECTS OF SOME OF THE CHEMICAL REACTIONS USED	21
Methylation analysis	21
Periodate oxidation studies	24
Smith degradation	29
Chromium trioxide oxidation	29
Graded hydrolysis	30
Degradation based on β -elimination	31
Engyme hydrolysis	32
Physico-chemical methods	33

PART - II

STRUCTURAL STUDIES ON A HEMICELLULOSE FRACTION
ISOLATED FROM THE TRUNK OF A YOUNG BAEI TREE

INTRODUCTION	36
RESULTS AND DISCUSSION			
Isolation, purification and characterization of the constituent sugars present in the hemicellulose	37
Isolation and characterization of the aldobiouronic acid	41
Methylation studies on hemicellulose IIA and carboxyl-reduced hemicellulose IIA			43
Periodate oxidation and Smith degradation studies on hemicellulose IIA	47
Anomeric configurations of sugars	48
CONCLUSIONS	50
EXPERIMENTAL			
Isolation of holocellulose from the trunk of a bael (<u>Aegle marmelos</u>) tree	51
Isolation of hemicellulose fractions	51
Identification and estimation of sugars present in hemicelluloses I and II	53
Purification of hemicellulose II	54
Preparation of carboxyl-reduced hemicellulose IIA	55
Estimation of sugar components in hemicellulose IIA	55
Determination of the nature of sugar components	56

	<u>Page</u>
Mild acid hydrolysis of hemicellulose IIA and isolation of aldobiouronic acid ...	56
Acid hydrolysis and identification of the reducing sugar of the aldobiouronic acid ...	57
Methylation analysis of the aldobiouronic acid ...	58
Methylation studies on hemicellulose IIA and carboxyl-reduced hemicellulose IIA ...	59
Periodate oxidation of hemicellulose IIA ..	63
Smith degradation of hemicellulose IIA ...	63
Oxidation of carboxyl-reduced hemicellulose IIA with chromium trioxide ...	64

PART - III

• STUDIES ON A NEUTRAL POLYSACCHARIDE ISOLATED FROM
BAEL FRUIT PULP

RESULTS AND DISCUSSION

Extraction of crude polysaccharide from pulp of bael (<u>Aegle marmelos</u>) fruit and characterization of constituent sugars ...	66
Fractionation of polysaccharide A with calcium chloride ...	67
Resolution of polysaccharide C on a DEAE-cellulose column ...	68
Attempted fractionation of polysaccharide D, on column of Sephadex G-100 ...	68
Hydrolysis of polysaccharide D and estimation of sugar components ...	70
Methylation analysis of polysaccharide D ..	70

	<u>Page</u>
Smith degradation of polysaccharide D ...	73
Chromium trioxide oxidation of polysaccharide D ...	74
Grade hydrolysis studies on polysaccharide D ...	76
CONCLUSIONS ...	78
EXPERIMENTAL	
Extraction of polysaccharide from fruit pulp ...	80
Hydrolysis of the polysaccharide A and B, and identification of the sugar components ...	81
Estimation of sugar components ...	82
Fractionation of the polysaccharide A with calcium chloride ...	82
Resolution of polysaccharide C on a DEAE-cellulose column ...	83
High-voltage electrophoresis of different polysaccharide fractions ...	84
Column chromatography, on Sephadex G-100, of polysaccharide D ...	84
Estimation of sugars in polysaccharide D ..	85
Methylation analysis of polysaccharide D ..	85
Smith degradation of polysaccharide D ...	86
Oxidation of polysaccharide D with chromium trioxide ...	87
Graded hydrolysis studies on polysaccharide D ...	87
Characterization of oligosaccharides ...	88

PART - IV

STUDIES ON A POLYSACCHARIDE FROM THE CAMBIUM
LAYER OF BAEI TREE

RESULTS AND DISCUSSION

Extraction of crude polysaccharide from cambium layer of bael tree and characterization of constituent sugars	...	90
Purification of crude polysaccharide	...	90
Identification and estimation of sugar components in polysaccharide F	...	92
Methylation analysis of polysaccharide F	...	92
Smith degradation of polysaccharide F	...	97
Oxidation of polysaccharide F with chromium trioxide	...	97
Graded hydrolysis studies on polysaccharide F	...	98
CONCLUSIONS	...	102

EXPERIMENTAL

Isolation of polysaccharide from the cambium layer of a bael tree	...	103
Identification and estimation of sugar components present in crude carbohydrate material	...	104
Purification of the crude carbohydrate material	...	104
High-voltage electrophoresis	...	105
Determination and estimation of sugars present in purified polysaccharide (F)	...	105

		<u>Page</u>
Methylation analysis of polysaccharide F	...	106
Smith degradation studies on polysaccharide F	...	107
Oxidation of polysaccharide F with chromium trioxide	...	107
Graded hydrolysis of polysaccharide F	...	108
Acid hydrolysis of the oligosaccharides	...	109
Methylation analysis of the oligosaccharides	...	109
