

## Acknowledgement

Here comes to an end of another inexplicable academic journey, the hardest one indeed. At the verge of completion of my long awaited Ph.D. thesis, I take the pleasure to sincerely acknowledge all those who have been involved and contributed to the research work that has been conducted during this period.

My profound gratitude is for my supervisor Dr. Amit Pal, Scientist E, Division of Pathophysiology, NICED for being a never-ending source of inspiration, enthusiasm and motivation. His indispensable guidance, innovative ideas, continuous support, and stimulating discussions made me to acquire my current knowledge in the field of protein research. Thank you sir for introducing me to the exhilarating world of bacterial proteases. I am deeply thankful to him for believing in me and having patience even in the struggling times of my work.

I am truly indebted to Dr. Sulagna Basu, Division of Bacteriology, NICED who provided me an opportunity to work in the field of neonatal septicemia and allowed me to gain access to her laboratory and research facilities. Without her precious help this thesis would not have been accomplished. I truly wish to express my heartfelt gratefulness to her for her immense effort, thorough guidance, insightful suggestions and untiring help to carry out my research work.

I sincerely thank Dr. Manoj Kumar Chakrabarti, former Director-In-Charge and Head, Division of Pathophysiology, NICED for his continuous support, encouragement and needful suggestions and administrative help during the research tenure.

I feel privileged to acknowledge Dr. Nabendu Shekhar Chatterjee, Division of Biochemistry, NICED for generously helping me in the molecular biology part of my research work. His immense knowledge of molecular biology and thoughtful suggestions really helped me to accomplish a major part of my research work.

I am grateful to the ex Director of NICED, Dr. G.B. Nair for providing me with the golden opportunity to work in this esteemed institute. I also deeply admire the present director of NICED, Dr. Shanta Dutta for all the research facilities and for administrative support and help.

I would also like to thank Dr. M.K. Hoque, Dr. Hemanta Koley, Dr. S. S. Das, eminent scientists of NICED.

All my past and present laboratory members truly deserve my heartfelt appreciation. I owe my sincere thanks to my seniors Dr. Aurelia Syngkon, Dr. Elluri Sridhar, Dr. Debasis Pore, Dr. Nibedita Mahata and Dr. Tanusree Ray for helping me in performing all laboratory experiments, for their valuable suggestions to overcome difficulties in doing a particular experiment and obviously for giving me practical advice at each step of my work. I also thank my friends and juniors for their uncountable support. The name that really deserves to be listed at the top is Mr. Ayan Mondal. I will really cherish the moments of working together, trying to solve each other's problems sincerely and for creating such a healthy work ambience. I thank my other labmates Sk. Irshad Ali, Mr. Rajshekhar Bhowmick, Dr. Poulomee Karmakar. I owe my deep sense of gratitude to Mr. Biplab Roy for his technical assistance during the period of my work. My heartfelt appreciation is for Ms. Moumita Mondal, Ms. Somdatta Chatterjee, Mr. Amarshi Mukherjee, Ms. Pujarini Dutta, Ms. Atri Ta, Ritam Sinha, Drubo Nag for their help and support.

I also deeply admire all the teachers of my school, college and University for building up my scientific mindset and for enriching me with their immense knowledge.

My sincere thanks to University Grants Commission, New Delhi for providing my research fellowship.

I think this thesis finally came into existence because of my parents. Their unconditional love, intensive care, financial and moral support helped me to achieve my goals in life. I deeply respect all their sacrifices that they have made for fulfilling each and every need of my life.

I am really thankful to the almighty for blessing me with such lovely and caring in-Laws. Their immense support and co-operation made me to complete this journey of my Ph.D. thesis.

Last but not the least my big thank you to my loving and caring husband for cheering me up in all difficult situations, for always boosting my confidence and for being so sensible, co-operative and perceptive.

**Rima Tapader**
